Introduction

"Technopath Clinical Diagnostics mission is to provide clinical diagnostics solutions which positively impact the quality of people's lives by improving healthcare."

Technopath Clinical Diagnostics is a global leader in the development, manufacturing and delivery of high quality third party quality controls and QC data management software for the In-Vitro Diagnostics industry.

Our customers include hospitals, clinical laboratories, research facilities, CROs and blood banks in over 130 countries globally. Our partners equally are the leading innovators of clinical diagnostics instruments and systems and we collaborate with the most experienced academic institutions and reference laboratories in our research and development activities.

Trusted Provider

Technopath is now valued as a single, trusted source that helps laboratories achieve their QC goals with a broad portfolio of QC products and comprehensive range of informatics solutions and support services.

Third-party QC material facilitates meeting accreditation and regulatory guidelines, such as CLIA, CLSI, CAP and ISO.

Control materials targeted at clinical decision points helps improve clinicians' confidence in the validity of test results.

Human-based matrices provide patient-like performance to increase confidence in QC material results.

Large lot sizes and fewer lot changes, support continuity, efficiency and confidence in the QC process.

Automated Results Upload To IAMQC® Peer supported to efficiently fulfill accreditation requirements.

Customer Value

Our independent quality control materials incorporate a greater number of analytes, which enables extensive test menu consolidation. This in turn allows laboratories to simplify their inventory, reduce costs and improve efficiencies.

Our two flagship products, Multichem IA Plus and Multichem S Plus, contain more than 190 tests combined. These two products can replace up to 8 competitor products, driving significant efficiencies for laboratories.

The Technopath QC solution allows you to unlock QC process inefficiencies by:

- Reducing errors and improving Turn Around Time through reduced QC handling requirements.
- Eliminating wasted QC material by up to 75%*.
- Reducing QC storage by up to 80%* to help reclaim your inventory space.
- Reducing carbon footprint, consolidated products use fewer vials, which require less packaging.
- Powering automation of reporting and analysis of QC results and Peer comparison through our data management IAMQC software system.

Combine Multichem Consolidated QC with IAMQC® Data Management Solutions for optimal laboratory efficiencies

* Study on file with manufacturer

Quality Matters

Every day we are committed to delivering high quality, safe and effective clinical diagnostic products to achieve maximum customer satisfaction; by complying with the appropriate regulatory requirements supported by our Quality Management System.

Technopath Clinical Diagnostics is certified and has successfully achieved international regulatory market approvals for example:

- IVD 98/79/EC
- Europe CE Mark
- US FDA (previously 510k approved)
- Health Canada
- China NMPA
- Brazil ANVISA
- Australia TGA

Multichem is manufactured to the highest quality standards in our ISO 13485 accredited facility. Our proprietary manufacturing processes allow incorporation of greater numbers of analytes in to a single matrix, which enables extensive test menu consolidation.

Our products are manufactured using fresh frozen plasma sourced directly from national blood

banks. Having direct access to high quality fresh frozen plasma ensures that our products mimic the performance of patient samples as closely as possible, giving increased commutability. We maintain particular expertise in the stabilisation of labile analytes (i.e Troponin, Bilirubin, etc.) and we also use Human matrix based lipid additions to ensure commutability across testing systems.

The combination of these high quality raw materials and our proprietary process gives Technopath a significant competitive advantage over key global competitors.

Service and Support

With pressures increasing on the laboratory to turn around fast, accurate patient results, at Technopath we know that a high quality service offering is critical to success with any product entering the laboratory.

Our focus is to deliver high quality service, as well as advanced technology solutions to facilitate the entire quality control process from end to end.

QC Data Management Support

Our data management systems, IAMQC®, are designed to complement and support the Multichem product range. Having instant access to automated data analysis ensures that results can be reviewed efficiently, while reducing the potential for manual entry errors. We offer a range of software solutions from inter-laboratory analysis to next generation real-time software.

Our expertise and informatics solutions enable Technopath to offer a unique and comprehensive total QC solution.

Education Services

Technopath Clinical Diagnostics provides a full suite of Quality Control training services supported by our training materials.

Our support team will guide you through the process of establishing your independent Quality Control programme as a critical part of your Internal Quality Control Process.

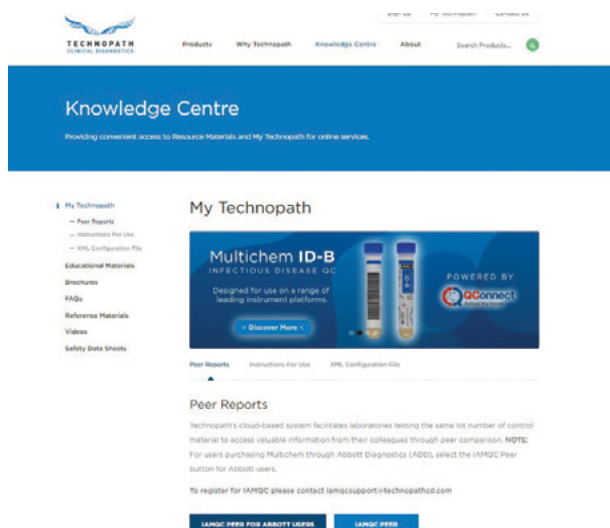

Whether you are just getting started or seeking to advance to six sigma verification within your laboratory, we have the solution to support your needs.

Supporting content, useful resources and reference materials are available through the **Knowledge Centre** on our website. It provides quick and easy access to useful documents including:

- Technopath Guide to Running QC
- The importance of Independent QC
- Six Sigma Explained
- Uncertainty of Measurement Explained
- The Essentials of Quality Control

And many others including support and guidelines around current and future RilibAK, IVDR and international standards requirements.

The Knowledge Centre is also home to 'My Technopath'. Use My Technopath to quickly link to IAMQC® Peer, access IFUs (Technical Library). For Abbott customers, XML files are also available.

Technical Support Services

Our technical support team comprises of experienced Laboratory Technologists, who are available to offer support for Multichem QC products and IAMQC informatics.

For support in all countries (outside the USA), please contact:

qcsupport@technopathcd.com for Multichem quality control products.

qcsoftware@technopathcd.com for IAMQC data management solutions.

For support in the USA, please contact:

qcsupport@technopathusa.com for Multichem quality control products.

qcsoftware@technopathusa.com for IAMQC data management solutions.

Support Through Strategic Partnerships

Technopath products are used by over 13,000 leading clinical laboratories in over 130 countries globally. Our significant growth over the last number of years has been directly linked to the success of our valued partnerships. These long term global distribution agreements are with some of the world's largest IVD platform manufacturers, including Abbott Laboratories, Radiometer and Beckman Coulter.

In 2018, Technopath Clinical Diagnostics USA opened its doors in Long Island, New York.

This enterprise is a joint venture between Technopath and Northwell Health, New York's largest healthcare group. Technopath USA markets and sells our Multichem and IAMQC products throughout the USA.

In addition, we continue to grow our educational partnerships with two leading organisations in the world of Quality Control.

Our partnership with Westgard QC ensures we can facilitate all customer education and training requirements for Clinical Chemistry QC, including the Sigma Verification Program.

Together with NRL Science of Quality (NRL), we deliver education and training in Serology QC backed by decades of experience and data.

Multichem® Chemistry Quality Controls

The Multichem Chemistry product range incorporates serum chemistry, immunology, lipid, TDM, enzymes and esoterics. It includes liquid-only unassayed and assayed products based on human matrix formulations.

Our human based matrix facilitates unrivaled test consolidation and offers increased stability. Together, these control characteristics offer greater quality control efficiencies without compromising compliance or confidence in patient results.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem S Plus	Assayed Single Level (Level 1)	15 x 10mL	CH101PLA

Multichem® S Plus

Replace **up to four** competitor chemistry QC products with Multichem **S Plus**

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem S Plus	Config.	Part Code
Assayed Single Level (Level 1)	15 x 10mL	CH101PLA
Assayed Single Level (Level 2)	15 x 10mL	CH102PLA
Assayed Single Level (Level 3)	15 x 10mL	CH103PLA
Unassayed Single Level (Level 1)	15 x 10mL	CH101CRP
Unassayed Single Level (Level 2)	15 x 10mL	CH102CRP
Unassayed Single Level (Level 3)	15 x 10mL	CH103CRP
Mini kit (contains one vial of each level)	3 x 1 x 10mL	CH100MCRP

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C.

Instruments

Multichem **S Plus** is suitable for use on all major platforms.

Multichem® AE

Multichem® CSF

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem AE	Config.	Part Code
Assayed Single Level (Level 1)	12 x 2mL	AE611A
Assayed Single Level (Level 2)	12 x 2mL	AE612A
Assayed Single Level (Level 3)	12 x 2mL	AE613A
Unassayed Single Level (Level 1)	12 x 2mL	AE611X
Unassayed Single Level (Level 2)	12 x 2mL	AE612X
Unassayed Single Level (Level 3)	12 x 2mL	AE613X
Assayed Bi-Level	2 x 6 x 2mL	AE600A
Unassayed Bi-Level	2 x 6 x 2mL	AE600X
Assayed Tri-Level	3 x 4 x 2mL	AE610A
Unassayed Tri-Level	3 x 4 x 2mL	AE610X
Mini Kit (one vial of each level)	3 x 1 x 2mL	AE610MX

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 14 day open vial stability at 2°C to 8°C.

Instruments

Multichem **AE** is suitable for use on all major platforms.

Analyte List

Ammonia
Ethanol

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem CSF	Config.	Part Code
Assayed Bi-Level	2 x 6 x 2mL	CF100A
Unassayed Bi-Level	2 x 6 x 2mL	CF100X

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem **CSF** is suitable for use on all major platforms.

Multichem® S Plus

Barcoded QC

Distributed by Abbott Diagnostics

Benefits

- On-board storage on the Alinity c system in a temperature controlled reagent carousel.
- Automatically runs directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Please order through your local Abbott distributor.

Multichem S Plus for ALINITY	Config.	Part Code

Multichem® Immunology Quality Controls

Multichem P (Protein) is specifically designed as a supplementary QC product for immunoproteins to be used in conjunction with our clinical chemistry QC. This product offers elevated concentrations for immunoproteins. Users can use this in conjunction with 1, 2 or 3 levels of Multichem S Plus or Multichem S, each of which already include multiple concentrations for immunoproteins. The full list of products available are shown below.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem P	Assayed Single Level Kit	12 x 3mL	SP41PA
	Unassayed Single Level Kit	12 x 3mL	SP40PX
	Mini Kit - Unassayed Single Level	2 x 3mL	SP40PMX
Multichem P for Architect c Distributed By Abbott Contact your local Abbott distributor to place an order.	Assayed Single Level Kit	12 x 3mL	05P81-10
Multichem P for Alinity c Barcoded QC Distributed By Abbott Contact your local Abbott distributor to place an order.	Assayed Single Level Kit	12 x 3mL	08P90-10

Multichem® Urine Chemistry Quality Controls

Our leading urine chemistry control is Multichem U. This product provides a single product to cover the majority of standard urine chemistry assays, including Microalbumin, which some competitors provide a separate QC product for. The full list of products available are shown below.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem U	Assayed Single Level (Level 1)	15 x 10mL	UC201A.10
	Assayed Single Level (Level 2)	15 x 10mL	UC202A.10
	Unassayed Single Level (Level 1)	15 x 10mL	UC201X
	Unassayed Single Level (Level 2)	15 x 10mL	UC202X
	Unassayed Mini Kit (contains one vial of each level)	2 x 10mL	UC200MX
Multichem U Distributed By Abbott Contact your local Abbott distributor to place an order.	Assayed Bi-Level Kit	2 x 6 x 5mL	05P80-10

Multichem® Immunoassay Quality Controls

Our flagship immunoassay product is Multichem IA Plus. Multichem IA Plus consolidated over 90 analytes into a single product and can replace up to four competitor products in your lab. We also offer Multichem IA, which omits CA 19-9, CA 15-3 and CA 125 from the consolidated list of analytes. In addition to the two consolidated controls, we offer Multichem IA Speciality, providing extended open vial stability for peptide hormones, in addition to tri-level utility for BNP, PTH, ACTH, PCT and CT.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem IA Plus	Assayed Tri-Level	3 x 4 x 5mL	IA310A
	Assayed Single Level (Level 1)	12 x 5mL	IA311A
	Assayed Single Level (Level 2)	12 x 5mL	IA312A
	Assayed Single Level (Level 3)	12 x 5mL	IA313A

Multichem® IA

Order Information

Multichem IA	Config.	Part Code
Assayed Tri-Level	3 x 4 x 5mL	IA300A
Assayed Single Level (Level 1)	12 x 5mL	IA301A
Assayed Single Level (Level 2)	12 x 5mL	IA302A
Assayed Single Level (Level 3)	12 x 5mL	IA303A
Unassayed Tri-Level	3 x 4 x 5mL	IA300X
Unassayed Single Level (Level 1)	12 x 5mL	IA301X
Unassayed Single Level (Level 2)	12 x 5mL	IA302X
Unassayed Single Level (Level 3)	12 x 5mL	IA303X
Mini kit (contains one vial of each level)	3 x 1 x 5mL	IA300MX

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Multichem **IA** contains 83 analytes, but excludes tumour markers, which are available in Multichem **IA Plus**

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem **IA** is suitable for use on all major platforms.

Multichem® IA Plus

Barcoded QC
Distributed by Abbott Diagnostics

Features

- On-board storage on the Alinity i system in temperature controlled reagent carousel.
- Automatically run directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.
- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Multichem IA Plus for Alinity	Config.	Part Code
Assayed Tri-Level	3 x 4 x 5mL	08P86-10

Specifications

- 28 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.
- 5 day on-board storage stability*.

Instruments

Barcoded Multichem **IA Plus**, distributed by Abbott Diagnostics, is assayed for Abbott Alinity i and Architect i instruments.

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Cardiac Quality Controls

Our core cardiac assessment product is the Multichem hsTn QC for high sensitive troponin assays. This product provides a high level of stability and confidence in your testing at the low concentrations that are relevant for today's cardiac assessment strategies. This product can be used as a stand-alone product or in conjunction with our consolidated immunoassay products; Multichem IA Plus or Multichem IA, that include a wide range of cardiac markers.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem hsTn	Assayed Single Level Kit	12 x 3mL	HS301A
	Unassayed Single Level Kit	12 x 3mL	HS301X
	Mini Kit - Unassayed Single Level	3 x 3mL	HS301MX
Multichem hsTn for Architect Distributed By Abbott	Assayed Single Level Kit	12 x 3mL	04W26-10

Multichem® hsTn

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem hsTn	Config.	Part Code
Assayed Single Level	12 x 3mL	HS301A
Unassayed Single Level	12 x 3mL	HS301X
Mini kit Unassayed Single Level	3 x 3mL	HS301MX

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

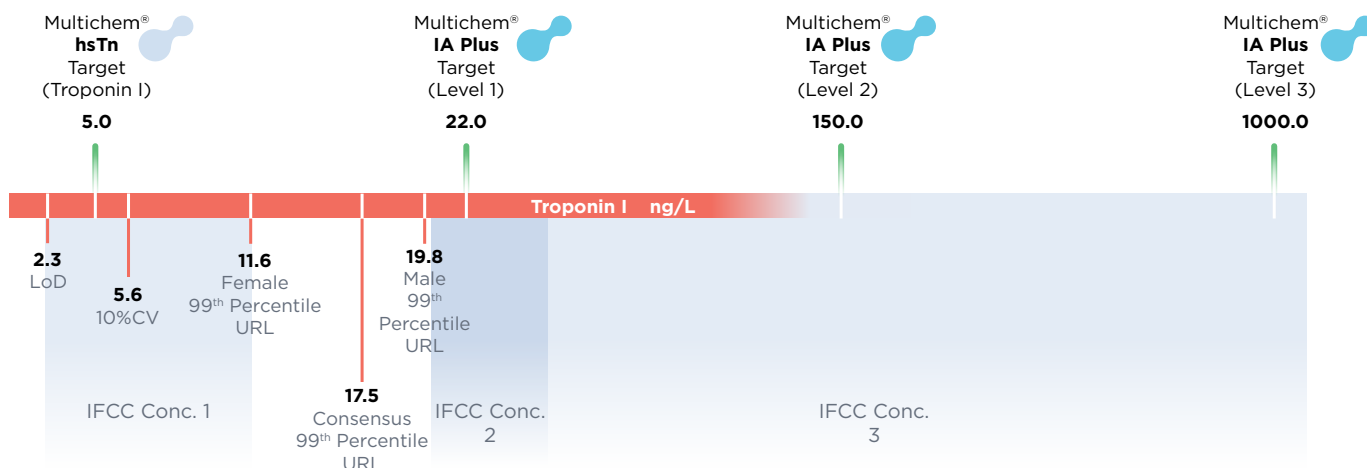

Multichem **hsTn** is suitable for use on all major platforms.

Analyte List

Troponin I
Troponin T

Example of Multichem hsTn Targeted Concentration on a Sample Platform

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® hsTn

Distributed by Abbott Diagnostics

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Please order through your local Abbott distributor.

Multichem hsTn for ARCHITECT	Config.	Part Code
Assayed Single Level	12 x 3mL	04W26-10

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

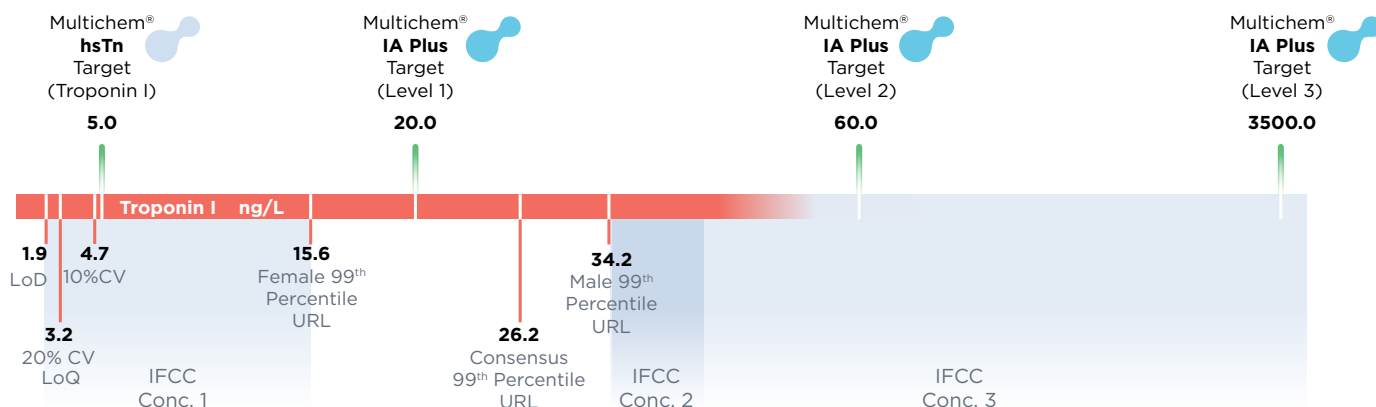

Multichem **hsTn**, distributed by Abbott Diagnostics, is assayed for Abbott Architect i instruments.

Analyte List

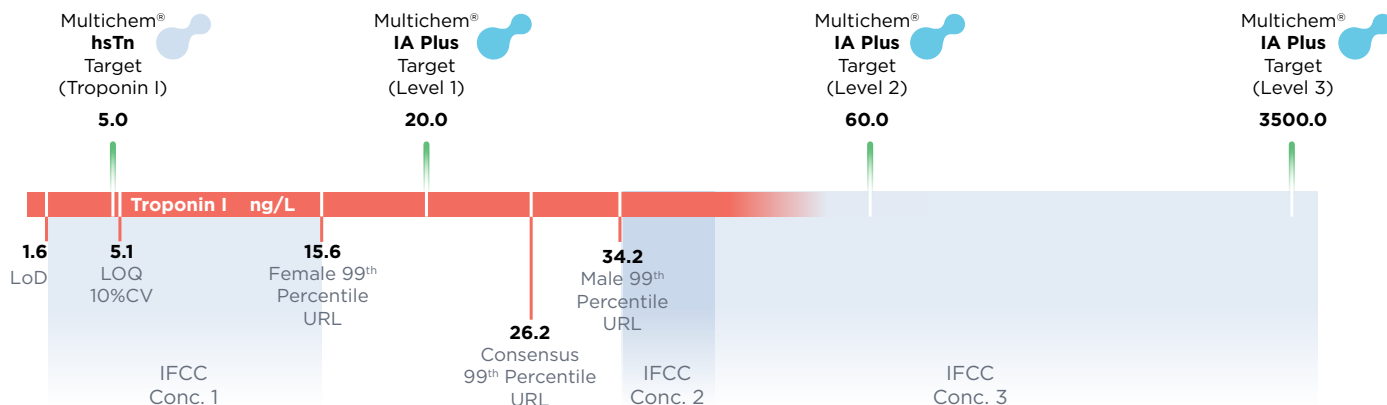

Troponin I

Abbott Architect STAT High Sensitive Troponin-I

Abbott Alinity i STAT High Sensitive Troponin-I

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Diabetes Quality Controls

Our leading diabetes product is Multichem A1c, third party QC for haemoglobin A1c. The haemoglobin A1c test, also called HbA1c, glycated haemoglobin test, or glyco-haemoglobin, is an important blood test that shows how well a patient's diabetes is being controlled. The full list of products available are shown below.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem A1c	Assayed Bi-Level	2 x 6 x 1mL	HB000A
	Assayed Single Level (Level 1)	12 x 1mL	HB001A
	Assayed Single Level (Level 2)	12 x 1mL	HB002A
	Assayed Mini Kit (contains one vial of each level)	2 x 1 x 1mL	HB000M
Multichem A1c for Architect Distributed By Abbott Contact your local Abbott distributor to place an order.	Assayed Bi-Level Kit	2 x 6 x 1mL	04V0610

Multichem® A1c

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem A1c	Config.	Part Code
Assayed Bi-Level	2 x 6 x 1mL	HB000A
Assayed Single Level (Level 1)	12 x 1mL	HB001A
Assayed Single Level (Level 2)	12 x 1mL	HB002A
Assayed Mini Kit (Contains one vial of each level)	2 x 1 x 1mL	HB000M

Specifications

- 24 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem A1c is suitable for use on all major platforms.

Analyte List

HbA1c

Multichem® A1C

Distributed by Abbott Diagnostics

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Please order through your local Abbott distributor.

Multichem A1c for ARCHITECT & ALINITY	Config.	Part Code
Assayed Bi-Level	2 x 6 x 1mL	04V06-10

Specifications

- 24 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem A1c, distributed by Abbott Diagnostics, is assayed for Abbott Architect c4000, c8000 and Alinity c systems.

Analyte List

HbA1c

Multichem® Fertility Quality Controls

Multichem AMH Control is intended for use as a third party, tri-level, liquid stable quality control material to monitor the precision of laboratory testing procedures for Anti-Müllerian Hormone Assays.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem AMH	Assayed Tri-Level	3 x 4 x 2mL	AM500A
	Unassayed Tri-Level	3 x 4 x 2mL	AM500X
	Unassayed Mini Kit (contains one vial of each level)	3 x 1 x 2mL	AM500MX

Multichem® AMH

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem AMH	Config.	Part Code
Assayed Tri-Level	3 x 4 x 2mL	AM500A
Unassayed Tri-Level	3 x 4 x 2mL	AM500X
Unassayed Mini Kit (Contains one vial of each level)	3 x 1 x 2mL	AM500MX

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem **AMH** is suitable for use on all major platforms..

Analyte List

Anti-Müllerian Hormone

Multichem® Immunosuppressant Quality Controls

Multichem WBT (WBT for Whole Blood Transplant), provides tri-level QC to monitor the precision of laboratory testing procedures for Cyclosporine, Tacrolimus and Sirolimus assays. The full list of products available are shown below.

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem WBT	Assayed Tri-Level	3 x 4 x 2mL	WB000A
	Unassayed Tri-Level	3 x 4 x 2mL	WB000X
	Unassayed Mini Kit (contains one vial of each level)	3 x 1 x 2mL	WB000MX
Multichem WBT Distributed By Abbott	Assayed Tri-Level for Architect	3 x 4 x 2mL	05P77-10
Contact your local Abbott distributor to place an order.	Assayed Tri-Level for Alinity	3 x 4 x 2mL	04S16-10

Multichem® WBT

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Analyte List

Cyclosporine
 Folate*
 Glucose*
 Sirolimus
 Tacrolimus

*Please refer to lot specific package inserts for stability and performance claims.

Multichem WBT	Config.	Part Code
Assayed Tri-Level	3 x 4 x 2mL	WB000A
Unassayed Tri-Level	3 x 4 x 2mL	WB000X
Unassayed Mini Kit (Contains one vial of each level)	3 x 1 x 2mL	WB000MX

Specifications

- 30 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem WBT is suitable for use on all major platforms.

Multichem® WBT

Distributed by Abbott Diagnostics

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Order Information

Multichem WBT	Config.	Part Code
Assayed Tri-Level for Architect	3 x 4 x 2mL	05P77-10
Assayed Tri-Level for Alinity	3 x 4 x 2mL	04S16-10

Specifications

- 30 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem WBT, distributed by Abbott Diagnostics, is assayed for Abbott Architect and Alinity systems.

Please order through your local Abbott distributor.

Analyte List

Cyclosporine
Folate*
Glucose*
Sirolimus
Tacrolimus

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Coagulation Quality Controls

Multichem D-Dimer Control is intended for use as a third party, bi-level, liquid stable quality control material to monitor the precision of laboratory testing procedures for D-Dimer Assays

Multichem® D-Dimer

Order Information

Multichem D-Dimer	Config.	Part Code
Assayed Bi-Level	2 x 6 x 1mL	DM900A
Assayed Single Level (Level 1)	12 x 1mL	DM901A
Assayed Single Level (Level 2)	12 x 1mL	DM902A
Unassayed Bi-Level	2 x 6 x 1mL	DM900X
Unassayed Single Level (Level 1)	12 x 1mL	DM901X
Unassayed Single Level (Level 12)	12 x 1mL	DM902X
Unassayed Mini Kit (Contains one vial of each level)	2 x 1 x 1mL	DM900MX

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem **D-Dimer** is suitable for use on all major platforms.

Analyte List

D-Dimer

Multichem® ID Infectious Disease QC

Technopath's Multichem ID (Infectious Disease) range has been specifically tested to match assays commonly used for infectious diseases testing. The first two products brought to market include Multichem ID-B a positive multi-marker QC, and Multichem ID-SeroNeg, a negative QC

PRODUCT	DESCRIPTION	SUITABLE ON PLATFORMS FROM	KIT CONFIGURATION	PART CODE
Multichem ID-B	Multi-Analyte Positive Control	Abbott, Diasorin	4 x 5mL	SR101B
Multichem ID-B Mini Kit	Multi-Analyte Positive Control	Abbott, Diasorin	1 x 5mL	SR101MB
Multichem ID-G	Multi-Analyte Positive Control	Roche	4 x 5mL	SR102G
Multichem ID-G Mini Kit	Multi-Analyte Positive Control	Roche	1 x 5mL	SR102MG
Multichem ID-SeroNeg	Negative Control	All	4 x 5mL	SR100N
Multichem ID-SeroNeg Mini Kit	Negative Control	All	1 x 5mL	SR100MN

Powerful Infectious Disease QC Support with NRL Science of Quality

Technopath's partnership with NRL Science of Quality (NRL) combines our new range of third party quality control materials for infectious disease, Multichem® ID, with NRL's QConnect program. Technopath has further collaborated with NRL to provide an integrated cloud-based QC software program, utilizing the most advanced functionality available from Technopath's IAMQC® software and NRL's EDCNet software specifically designed for monitoring serology results.

Traditional QC approaches used to determine QC limits have been derived or modified from clinical chemistry and may not be applicable to serology. QConnect Limits, developed by NRL, utilises historical data by determining expected upper and lower values of results for each QC sample/assay combination.

Multichem ID controls can be used as part of the QConnect solution, developed by NRL.

QConnect is your completely integrated and simplified QC solution. QConnect includes the Multichem ID product range, results management and reporting through IAMQC and EDCNet, control limits, Uncertainty of Measurement (MoU) reports, troubleshooting and the ability to liaise with other users.

EDC Net

For a consolidated laboratory that is performing serology testing with chemistry and immunoassay testing, this means there is one user interface, IAMQC Peer, to access all peer data

EDCNet is an internet-based software program specifically designed for monitoring both serology and NAT QC results. EDCNet allows for the simple collection, management and analysis of QC data in real-time. Technopath provides instant access to EDCNet via IAMQC Peer software. For more information visit our **informatics section**.

Multichem® ID-B

Features

- Ready to use liquid stable controls
- Manufactured using native human plasma
- Direct sampling from control tubes
- Instrument specific barcodes
- Technical and Scientific support

Order Information

Multichem ID-B	Config.	Part Code
Positive Control	4 x 5mL	SR101B
Positive Control Mini Kit	1 x 5mL	SR101MB

Specifications

- 24 month* closed tube stability at 2°C to 8°C.
- 30 day open tube stability at 2°C to 8°C.

Instruments

Multichem ID-B is specifically optimised for Abbott and Diasorin instrument platforms.

Analyte List

Anti-HIV-1 IgG
Anti-HCV IgG
Anti-HBc IgG
HBsAg
Anti-HTLV-I IgG
Anti-Treponema Pallidum IgG

* Lot specific at launch - Targeted 24 month closed tube stability.

IAMQC® QC Software Solutions

PRODUCT	DESCRIPTION	ORDERING
IAMQC Peer	Real-time peer cloud-based comparison software	Contact our QC Software experts to find the 'best fit' QC software solution for your laboratory. Worldwide: qcsoftware@technopathcd.com USA: qcsoftware@technopathusa.com
IAMQC Infinity	Next generation cloud based software, designed to exactly meet your QC solution needs. Incorporates IAMQC Daily, the comprehensive internal QC software	
IAMQC Expert	Interactive system that selects and suggests QC rules	
IAMQC Transfer	Advanced connectivity solution for laboratories	

Analyse QC results in real-time

Designed to complement and support Technopath's Multichem® Quality Control (QC) product range, IAMQC Software provides Laboratory Managers and Technologists with a range of QC software tools to analyse their QC results in real-time.

IAMQC Software products allow users to automate, centralise, standardise and improve QC processes in a laboratory setting. Our combination of modules satisfy the varying levels of QC requirements in individual laboratories and are easily tailored to meet different QC management expectations.

Technopath's full suite of software products provide clinical laboratories with significant cost and time savings, whilst delivering higher confidence in analytical testing methods. Choose from Intranet and/or Internet based statistical quality control and quality assurance software products. IAMQC software products are practical, graphical, user-definable and easy to use.

IAMQC Software Products Help:

BENCH TECHNOLOGISTS:

- Spend less time on false positive QC flags.
- Concentrate on tests that require their attention.
- Spend less time trouble-shooting QC.
- Know how to react when the mean shifts.
- Assess the acceptability of new reagent lots and calibration events.
- Solve QC problems.

LAB MANAGERS:

- Choose QC rules to maximise true rejects and minimise false rejects.
- Quickly see the tests that require their attention.
- Skim graphics to quickly review current or historical data by lab, department, instrument or test.
- Monitor performance in groups of laboratories.
- Review problem tests and QA activities in local and remote labs.

LAB OR HOSPITAL ADMINISTRATORS:

- Save money.
- Improve quality.
- Improve service.
- Review Administrative Summary Reports to ensure quality performance.

IAMQC® Peer

IAMQC Peer - At a Glance

Bias Report	✓
Exception Notes Report	✓
Group Coordinator Report	✓
Levey Jennings Report	✓
Measurement of Uncertainty	✓
Monthly Standard Report	✓
Peer Report	✓
Sigma Metrics Report	✓
Youden Plot Report	✓

Benefits - IAMQC Peer

Real-time Peer data comparison	✓
Facilitates Standards approvals	✓
Centralised data management	✓
Automatic data submission	✓
Cloud based system	✓
User-Friendly	✓

What is an interlaboratory program?

In its simplest form, an interlaboratory program is a means for individual labs to compare their performance against other labs. The comparison will be against other labs using the same lot of quality control (QC) material on the same test and on the same instrument type. Interlaboratory programs offer various reports to show how your instruments in your lab compare against all others with these reports being generated at the end of the month once all data has been submitted. Some interlaboratory programs offer real-time peer comparison where the values displayed are based on all of the data that has been submitted up to the time of report generation or statistic viewing.

Why should you use an interlaboratory program?

Any laboratory that strives to achieve ISO accreditation should be part of an interlaboratory program:

"The laboratory shall participate in interlaboratory comparison programme(s) ..." - ISO 15189:2012(E), Subclause 5.6.3.1.

This ISO standard specifies the quality management system requirements particular to medical laboratories and helps to set a level of performance and competency that labs should attain. The medical laboratory is an important part of patient care as all tests results come from the lab so ensuring your systems are in control is a vital part of this process. An interlaboratory program can provide comfort to the lab by demonstrating that your performance is in line with other labs. When your lab's performance is not in line with others, the interlaboratory program highlights this to you quickly.

How does IAMQC Peer help with participation in an interlaboratory program?

IAMQC Peer is a web based truly real time peer comparison system. Truly real-time means that all

data submitted is included in the peer statistics at the time of report generation or when viewing the interactive peer statistics. IAMQC Peer shows labs each of their individual instruments performance and compares the accuracy and precision of the analytical processes to their peer group. The peer group will contain instruments of the same type from other laboratories using the same lot of QC material and using the same method for the test. The information from the reports and interactive peer statistics in IAMQC Peer can be extremely valuable, indicating the user's performance relative to their peer group as well as providing powerful troubleshooting tools when attempting to resolve potential problems. IAMQC Peer has multiple interfacing solutions to allow for the automation of data submission helping busy lab personnel to concentrate on the important activities of testing and result interpretation.

IAMQC Peer contains multiple reports, all of which provide key information to the lab in interpreting their instrument performance.

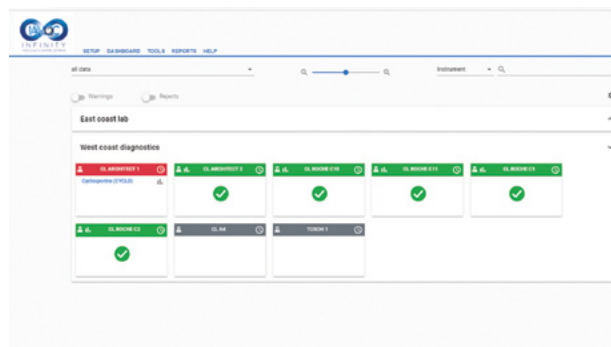

- **Group Coordinator report**
A test by test listing of statistics of the laboratory and it's peer groups for up to 3 levels of control
- **Levey-Jennings Report**
The LJ report displays individual QC means per analyte for the selected month.
- **Exceptions Report**
This report summarises the labs tests and analytical methods which differ in performance from its peer group using SDi and CVi.
- **Monthly Summary Report**
A rolling twelve-month window of summary statistics, including monthly mean for each test and level is displayed along with peer group values

- **Youden Plot**
The Youden plot visualizes both bias and imprecision graphically and can be used to evaluate systematic and/or random error.
- **Six Sigma**
The six sigma report automatically calculates the labs' sigma score based on the Total Allowable Error values entered.
- **Measurement of Uncertainty**
The system calculates the MoU value automatically based on the time range selected for the lot in question along with the SEM value or the running SD of each test for the time period selected.
- **Bias Report**
The bias report contains all the information in the Group Co-ordinator report plus a bias score against the cumulative peer mean for each test and is generated in Microsoft excel format.

IAMQC® Infinity

Next Generation Solutions

IAMQC Infinity is a powerful cloud based software, designed to exactly meet your QC solution needs.

Incorporating the popular IAMQC Daily software, this feature based interface allows the laboratory to build their custom solution and then to seamlessly add in further sophisticated features as and when needed.

IAMQC Infinity allows users to automate, centralise, standardise and improve QC processes in a laboratory setting. Our combination of features in one system satisfies the varying levels of QC requirements in individual laboratories and are easily tailored to meet different QC management expectations – IAMQC Infinity provides the customer with the ability to build their own QC solution. IAMQC Infinity provides clinical laboratories with significant cost and time savings, whilst delivering higher confidence in analytical testing methods.

IAMQC Infinity is a powerful cloud based software, which is feature rich, responding to your custom QC solution needs.

The most advanced connectivity solution available for laboratory instrumentation.

IAMQC Transfer is a connectivity device that can communicate with Laboratory Information Systems (LIS), Middleware, automated instrumentation and Point Of Care platforms. Through the use of our proprietary drivers and a single board computer device, IAMQC Transfer processes and communicates data from your system to any one of our powerful IAMQC software packages; IAMQC Peer, IAMQC Daily, IAMQC Expert or IAMQC Proficiency Testing module. By combining software and hardware elements, we can eliminate the requirement for additional PCs or servers. A plug-and-play set up, combined with over 200 available connectivity options ensure an un-matched level of flexibility – all within an incredibly small, seamless enclosure.

IVD Raw Materials

High Quality “Off-the-Shelf” and Custom IVD Raw Materials

At Technopath we understand and appreciate the complexity of single and multi-analyte quality control, PT sample, calibrator and reagent manufacturing.

By applying our expertise in multi-analyte quality control manufacturing to the development of our IVD Raw Materials it allows us to take an end-to-end view of the entire production process. This means we do not just consider the elements that our team is responsible for during the production of the material, but also the aspects that our customers intend to perform.

The benefit of this approach is that by working closely with our customers, we can eliminate duplication of effort and provide tailored solutions that are not available elsewhere.

PRODUCT	DESCRIPTION	SOURCE	FORM	PART CODE
Off-Clot Serum	Off the clot human serum extracted from whole blood samples	Human Plasma	Frozen Liquid	SOC-0001
Triglyceride Extract	Triglyceride concentrate	Avian	Frozen Liquid	TGL-0001
Human Lipoprotein Extract	Human Total Cholesterol concentrate containing HDL and LDL	Human Plasma	Frozen Liquid	HLPX
Human High Density Lipoprotein Extract	Elevated Human HDL	Human Plasma	Frozen Liquid	HHDL
Human Low Density Lipoprotein Extract	Elevated Human LDL	Human Plasma	Frozen Liquid	HLDL
Delipidised Human Serum	Lipid depleted and optically clear human serum	Human Plasma	Frozen Liquid	DLHS
Normal Human Serum	Derived from high quality human plasma	Human Plasma	Frozen Liquid	SF-0001
Pooled Recovered Human Plasma	Manufactured using fresh frozen human plasma	Human Plasma	Frozen Liquid	PF-0001

Off Clot Human Serum

Features

- Can be manufactured to **custom specifications** and aliquoted into bulk containers for ease of use and ease of storage.
- **Single units** and **pooled options** available.
- Human Plasma derived and allowed to **clot naturally** without being treated with anti-coagulant.
- Product is collected from plasma that is recovered from **whole blood** samples.
- Product can be provided **unfiltered or filtered** to 0.22 micron absolute pore size, if required.
- Preservative addition optional.
- **Closest performance** to patient sample.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Off Clot Human Serum	Human Plasma	Frozen Liquid	SOC-0001

To order Off Clot Human Serum, please contact:
ivdsupport@technopathcd.com

Triglyceride Extract

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need.
- Triglyceride extract manufactured using **proprietary processing** techniques developed by Technopath Clinical Diagnostics.
- Preservative additions optional.
- **Off-the-shelf** product specification available.
- Material can be provided **filtered to 0.22 micron** absolute pore size.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Triglyceride Extract	Avian	Frozen Liquid	TGL-0001

To order Triglyceride Extract, please contact:
ivdsupport@technopathcd.com

Human Lipoprotein Extract

Human High Density Lipoprotein Extract

Features

- Combined extract of human low density lipoproteins (LDL) and high density lipoproteins (HDL) in **physiological ratios**.
- Product can be manufactured to **custom specifications** providing you with the solution you need.
- **Manufactured from plasma** recovered from units of whole blood with a minimum Total Cholesterol concentration of 20.7 mmol/L or ~800 mg/dL
- Lipoproteins are **extracted from normal human serum** using proprietary processing techniques developed by Technopath.
- Preservative additions optional.
- **Filtered to 0.22 micron** absolute pore size to ensure low levels of bioburden and improved yield for our customers intending to perform downstream filtrations.
- **“Tailored” specifications** can be developed in conjunction with the customer to provide a customised solution to match specific requirements.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Human Lipoprotein Extract	Human Plasma	Frozen Liquid	HLPX

To order Human Lipoprotein Extract, please contact:
ivdsupport@technopathcd.com

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need.
- **Manufactured from plasma** recovered from units of whole blood with a final HDL concentration typically 20.7 mmol/L or ~800 mg/dL.
- High density lipoproteins are **extracted from normal human serum** using proprietary processing techniques developed by Technopath.
- Preservative additions are optional.
- **Filtered to 0.22 micron** absolute pore size to reduce bio-burden levels and improve yield for customers intending to perform downstream filtrations.
- **“Tailored” specifications** can be developed in conjunction with the customer to provide a customised solution to match specific requirements.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Human High Density Lipoprotein Extract	Human Plasma	Frozen Liquid	HHDL

To order Human High Density Lipoprotein Extract, please contact:
ivdsupport@technopathcd.com

Human Low Density Lipoprotein Extract

Delipidised Human Serum

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need.
- **Manufactured from plasma** recovered from units of whole blood with a final minimum LDL concentration typically 20.7 mmol/L (or ~800 mg/dL).
- Low density lipoproteins are **extracted from normal human serum** using proprietary processing techniques developed by Technopath.
- Preservative additions are optional.
- **Filtered to 0.22um** pore size prior to final dispensing to reduce bio-burden and improve yields for customers intending to perform downstream filtrations.
- **Low levels of HDL** present in the finished product.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Human Low Density Lipoprotein Extract	Human Plasma	Frozen Liquid	HLDL

To order Human Low Density Lipoprotein Extract, please contact:
ivdsupport@technopathcd.com

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need.
- **Manufactured from plasma** recovered from units of whole blood with a total cholesterol concentration typically <0.4mmol/L.
- Serum is defibrinated and lipoproteins are extracted using **proprietary processing techniques** developed by Technopath Clinical Diagnostics.
- Preservative additions optional.
- **Off-the-shelf** product contains normal salt levels.
- **Filtered to 0.22um** pore size.
- **“Tailored” specifications** can be developed in conjunction with the customer to provide a customised solution to match specific requirements.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Delipidised Human Serum	Human Plasma	Frozen Liquid	DLHS

To order Delipidised Human Serum, please contact:
ivdsupport@technopathcd.com

Normal Human Serum

Pooled Recovered Human Plasma

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need.
- Manufactured from high quality, consistent source of plasma that is recovered from units of **whole blood**.
- Serum is defibrinated using **proprietary processing techniques** developed by Technopath with or without the use of bovine thrombin.
- Preservatives addition is optional and based on customers' **individual preferences**.
- **Off-the-shelf** product contains normal salt levels.
- **Filtered to 0.22 micron** absolute pore size to reduce levels of potential bio-burden.
- **"Tailored" specifications** can be developed in conjunction with the customer to provide a customised solution to match specific requirements.
- Certificate of Analysis (COA) - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information

Product	Source	Form	Part Code
Normal Human Serum	Human Plasma	Frozen Liquid	SF-0001

To order Normal Human Serum, please contact:
ivdsupport@technopathcd.com

Features

- Product can be manufactured to **custom specifications** providing you with the solution you need and dispensed into bulk containers for ease of handling, use and storage.
- Manufactured from high quality, fresh frozen plasma recovered from units of whole blood. **Plasma frozen within 72 hours of collection**.
- **Tested and certified negative** for the standard panel of viral markers. Full traceability back to the donor units.
- Preservative additions optional and filtrations performed if required.
- Material also manufactured to **off-the-shelf specification**.
- Certificate of Analysis - available on request.
- Safety Data Sheet (SDS) - available on request.

Order Information
