Navigating this Catalogue

This interactive document is designed to provide quick and easy access to all product information, both in this catalogue and on our website, www.technopathcd.com.

Hyperlinks are provided throughout and are highlighted in bold text.

Other navigation tools include:

The Home icon on each section contents page links back to the main contents page.

The Menu icon on the side of each product page links back to contents page for that section.

The visit website icon links to the corresponding product web page.

Then LGC Clinical Diagnostics logo at the top of each page provides a quick link to www.lgcclinicaldiagnostics.com.

Ordering Products

Multichem Independent QC for all major platforms

To order Technopath's Multichem® QC products and IAMQC® software solutions please contact: [**technopath.info@lgcgroup.com**](mailto:technopath.info@lgcgroup.com).

Independent QC for Abbott Alinity and Architect systems

For independent QC and IAMQC software solutions for Alinity and Architect systems, please contact your local Abbott representative.

Independent QC for Roche cobas® systems

For independent QC and IAMQC software solutions for Roche **cobas**, please contact your local Roche representative.

Introduction

"Technopath Clinical Diagnostics mission is to provide clinical diagnostics solutions which positively impact the quality of people's lives by improving healthcare."

Technopath Clinical Diagnostics is now part of LGC Clinical Diagnostics.

LGC Diagnostics is a leading in vitro diagnostic (IVD) manufacturer of clinical diagnostic quality solutions and test components to the extended life science industry. We partner with In Vitro Diagnostics (IVD) Instrument Manufacturers, Healthcare System Labs, Reference Labs, clinical research organizations (CROs) and academic institutions in commercialization activities across the entire diagnostic pipeline - from concept and early-stage research, through expedited product development and onwards into routine clinical use. Laboratories and diagnostic professionals across disciplines of clinical chemistry, immunochemistry, serology, molecular diagnostics, and clinical genomics rely on LGC's products to achieve accurate and reliable diagnostic results.

Our combined and ever-growing capabilities mean we are better positioned to support the needs of the clinical diagnostics industry, from early feasibility and research to commercial & laboratory development test (LDT) assay development, installation, validation and ongoing performance monitoring support. LGC Clinical Diagnostics Quality Management and reagent component manufacturing facilities are FDA-registered, and ISO 13485 and ISO 9001 certified.

Our brands include three IVD manufacturers of QMTs and one manufacturer of viral and bacterial antigens

and antibodies:

Maine Standards Company

Calibration verification materials, validation & qualification panels, calibrators, and OEM PT/EQA samples

SeraCare Quality Controls,

Reference Materials, Biological Materials, reagent components

Technopath Clinical Diagnostics

Independent Quality Controls & QC Software Solutions

The Native Antigen Company

Viral and bacterial antigens/antibodies

Together, our brands serve over 7,500 customers in over 120 countries, providing products for more than 20 clinical application areas, including infectious diseases, NIPT, diabetes, cardiac disease and oncology. We are passionately committed to go beyond. In collaboration with our customers, our people and with absolute quality, we make the exploration of science our mission to create a safer world.

Enhance Laboratory Efficiencies

with Multichem® Independent Quality Controls and IAMQC® QC data management software

CONSOLIDATION

Fewer products required to meet your core laboratory control needs, leading to increased operational efficiencies, and reduced waste.

AUTOMATION

Load and go barcoded controls for greater throughput, reduced manual errors and automated QC data reporting.

QUALITY

Independent, 3rd party, human based controls with analytes targeted at clinical decision points supporting clinician quality goals.

Internal Laboratory Quality Control (IQC) is important in ensuring confidence in patient test results and in meeting accreditation requirements including CLIA, CLSI, CAP, RiliBÄK and ISO.

Increasingly Laboratories seek objective assessment and comparison of analytical methods and instrumentation performance, to meet their quality goals.

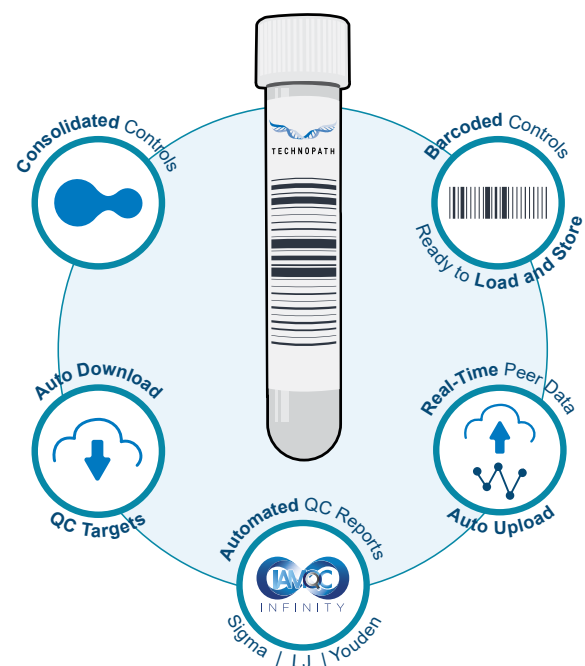

Technopath's Independent quality control solution, Multichem QC and IAMQC software, provides clinical laboratories with significant cost, handling and time savings, whilst delivering higher confidence in analytical testing methods.

Advancing Quality Control in the Clinical Laboratory

By utilising Multichem barcoded QC materials*, laboratories can optimise their QC workflow and minimise handling errors. It is supported and complemented with IAMQC® data management system.

*Platform dependent

QC Data Management Software

IAMQC Infinity Daily QC software, and Interlaboratory Peer software, support laboratory IQC while achieving greater efficiency and reducing costs. Early identification of trends enable corrections before results are compromised. IAMQC Infinity helps facilitate compliance under CLIA, ISO 15189 and RiliBÄK. Featuring real-time supervisor QC data review, validation with comprehensive audit trails, and comprehensive QC charts and reports for laboratory data analysis.

ISO, CAP, CLIA, RiliBÄK guidelines for laboratory testing support confidence in patient results.

QC data automatically collected and processed in a secure workflow.

Realtime QC data review, peer analysis, automated compliance reports and expert support & service.

Technical Support Services

Our technical support team comprises of experienced Laboratory Technologists, who are available to offer support for Multichem QC products and IAMQC informatics.

For support please contact:

technopath.qcsupport@LGCGroup.com for Multichem quality control products.

technopath.iamqcsupport@LGCGroup.com, for IAMQC data management solutions.

Quality Matters

Every day we are committed to delivering high quality, safe and effective clinical diagnostic products to achieve maximum customer satisfaction; by complying with the appropriate regulatory requirements supported by our Quality Management System.

Technopath Clinical Diagnostics is certified and has successfully achieved international regulatory market approvals for example:

- IVD Regulation (EU) 2017/746
- IVD 98/79/EC (CE Marked)
- HPRA (Health Products Regulatory Authority)
- MHRA
- US FDA (previously 510k approved)
- Health Canada
- China NMPA
- Brazil ANVISA
- Australia TGA

Multichem is manufactured to the highest quality standards in our ISO 13485 accredited facility. Our proprietary manufacturing processes allow incorporation of greater numbers of analytes in to a single matrix, which enables extensive test menu consolidation.

Our products are manufactured using fresh frozen plasma and urine. Having direct access to high quality fresh frozen plasma ensures that our products mimic the performance of patient samples as closely as possible, giving increased commutability. We maintain particular expertise in the stabilisation of labile analytes (i.e Troponin, Bilirubin, etc.) and we also use Human matrix based lipid additions to ensure commutability across testing systems.

The combination of these high quality raw materials and our proprietary process gives Technopath a significant competitive advantage over key global competitors.

Multichem® Chemistry Quality Controls

The Multichem Chemistry product range incorporates serum chemistry, immunology, lipid, TDM, enzymes and esoterics. It includes liquid-only unassayed and assayed products based on human matrix formulations.

Our human based matrix facilitates unrivaled test consolidation and offers increased stability. Together, these control characteristics offer greater quality control efficiencies without compromising compliance or confidence in patient results.

Multichem Chemistry Quality Controls - Suitable for use on all major platforms			
PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem S Plus	Assayed Single Level (Level 1)	15 x 10mL	CH101PLA
	Assayed Single Level (Level 2)	15 x 10mL	CH102PLA
	Assayed Single Level (Level 3)	15 x 10mL	CH103PLA
	Unassayed Single Level (Level 1)	15 x 10mL	CH101CRP
	Unassayed Single Level (Level 2)	15 x 10mL	CH102CRP
	Unassayed Single Level (Level 3)	15 x 10mL	CH103CRP
	Mini Kit (Unassayed Tri-level)	3 x 1 x 10mL	CH100MCRP
Multichem S	Assayed Single Level (Level 1)	15 x 10mL	CH101A
	Assayed Single Level (Level 2)	15 x 10mL	CH102A
	Assayed Single Level (Level 3)	15 x 10mL	CH103A
	Unassayed Single Level (Level 1)	15 x 10mL	CH101X
	Unassayed Single Level (Level 2)	15 x 10mL	CH102X
	Unassayed Single Level (Level 3)	15 x 10mL	CH103X
Multichem AE	Assayed Single Level (Level 1)	12 x 2mL	AE611A
	Assayed Single Level (Level 2)	12 x 2mL	AE612A
	Assayed Single Level (Level 3)	12 x 2mL	AE613A
	Unassayed Single Level (Level 1)	12 x 2mL	AE611X
	Unassayed Single Level (Level 2)	12 x 2mL	AE612X
	Unassayed Single Level (Level 3)	12 x 2mL	AE613X
	Assayed Bi-Level	2 x 6 x 2mL	AE600A
	Unassayed Bi-Level	2 x 6 x 2mL	AE600X
	Assayed Tri-Level	3 x 4 x 2mL	AE610A
	Unassayed Tri-Level	3 x 4 x 2mL	AE610X
Multichem CSF	Assayed Bi-Level	2 x 6 x 2mL	CF100A
	Unassayed Bi-Level	2 x 6 x 2mL	CF100X
Multichem NB	Assayed Single Level	12 x 2mL	NB800A
	Unassayed Single Level	12 x 2mL	NB800X

Multichem® S Plus

Replace up to four competitor chemistry QC products with Multichem S Plus

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C.

Instruments

Multichem S Plus, independent clinical chemistry QC, is suitable for use on all major platforms.

Order Information		
Multichem S Plus	Config.	Part Code
Assayed Single Level (Level 1)	15 x 10mL	CH101PLA

Multichem® S

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Multichem S contains 102 analytes, but excludes CRP and RF, which are available in Multichem S Plus

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C.

Instruments

Multichem S, independent clinical chemistry QC, is suitable for use on all major platforms.

Multichem® AE

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 14 day open vial stability at 2°C to 8°C.

Instruments

Multichem AE, independent Ammonia and Ethanol QC, is suitable for use on all major platforms.

Unassayed Bi-Level	2 x 6 x 2mL	AE600X
Assayed Tri-Level	3 x 4 x 2mL	AE610A
Unassayed Tri-Level	3 x 4 x 2mL	AE610X

Analyte List

Ammonia
Ethanol

Multichem® CSF

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem CSF, independent Cerebral Spinal Fluid QC, is suitable for use on all major platforms.

Order Information		
Multichem CSF	Config.	Part Code
Assayed Bi-Level	2 x 6 x 2mL	CF100A
Unassayed Bi-Level	2 x 6 x 2mL	CF100X

Analyte List

Glucose
Lactate
IgG
Protein

Multichem® NB

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 14 day open vial stability at 2°C to 8°C.

Instruments

- Multichem NB, independent Neonatal Bilirubin QC, is suitable for use on all major platforms.

Order Information		
Multichem NB	Config.	Part Code
Assayed Single Level	12 x 2mL	NB800A
Unassayed Single Level	12 x 2mL	NB800X

Analyte List

Bilirubin, Direct
Bilirubin, Total
Caffeine*
Theophylline

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Immunology Quality Controls

Multichem P (Protein) is specifically designed as a supplementary QC product for immunoproteins to be used in conjunction with our clinical chemistry QC. This product offers elevated concentrations for immunoproteins. Users can use this in conjunction with 1, 2 or 3 levels of Multichem S Plus or Multichem S, each of which already include multiple concentrations for immunoproteins. The full list of products available are shown below.

Multichem® P

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points
- Key elevated protein concentration for key medical relevance.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 14 day open vial stability at 2°C to 8°C.

Instruments

Multichem P is suitable for use on all major platforms.

Order Information		
Multichem P	Config.	Part Code
Assayed Single Level	12 x 3mL	SP41PA
Unassayed Single Level	12 x 3mL	SP40PX

Analyte List

Immunoproteins

- Alpha-1-acid glycoprotein
- Alpha-1 Antitrypsin
- Alpha 2-macroglobulin*
- Antistreptolysin O (ASO)*
- ADNase B (Anti-Streptococcal DNase)*
- Antithrombin III*
- Apolipoprotein A1 (APO A1)
- Apolipoprotein B (APO B)
- Beta -2 Microglobulin
- C1 Inhibitor*
- CH50 (Total hemolytic Complement)*
- Cystatin C*

Chemistry

- Albumin*
- Angiotensin Converting Enzyme*
- Ceruloplasmin
- Complement C3
- Complement C4
- C-Reactive Protein
- Ferritin*
- Haptoglobin
- Hemopexin*
- IgE*
- IgG1, Subclass*
- IgG2, Subclass*
- IgG3, Subclass*

- IgG4, Subclass*
- Immunoglobulin A
- Immunoglobulin G
- Immunoglobulin M
- Kappa Light Chain*
- Lambda Light Chain*
- Lipoprotein (a)*
- Prealbumin
- Properdin Factor B*
- Retinol Binding Protein*
- Rheumatoid Factor
- sTfR (Soluble Transferrin Receptor)*
- Total Protein*
- Transferrin

*Please refer to lot specific package inserts for stability and performance claims.

Multichem[®] Urine Chemistry Quality Control

Our leading urine chemistry control is Multichem U. This product provides a single product to cover the majority of standard urine chemistry assays, including Microalbumin, which some competitors provide a separate QC product for. The full list of products available are shown below.

Multichem[®] U

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 24 month closed vial stability at 2°C to 8°C.
- 30 day open vial stability at 2°C to 8°C.

Instruments

Multichem U is suitable for use on all major platforms.

Order Information		
Multichem U	Config.	Part Code
Assayed Single Level (Level 1)	15 x 10mL	UC201A.10
Assayed Single Level (Level 2)	15 x 10mL	UC202A.10
Unassayed Single Level (Level 1)	15 x 10mL	UC201X
Unassayed Single Level (Level 2)	15 x 10mL	UC202X

Analyte List

Amylase
Calcium
Chloride
Cortisol
Creatinine
Glucose

Human Chorionic Gonadotropin
Magnesium
Microalbumin
Osmolality
Phosphorous
Potassium

Sodium
Specific Gravity*
Urea Nitrogen
Uric Acid
Urinary Protein

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Immunoassay Quality Controls

Our flagship immunoassay product is Multichem IA Plus. Multichem IA Plus consolidates over 86 analytes into a single product and can replace up to four competitor products in your lab. We also offer Multichem IA, which omits CA 19-9, CA 15-3 and CA 125 from the consolidated list of analytes. In addition to the two consolidated controls, we offer Multichem IA Speciality, providing extended open vial stability for peptide hormones, in addition to tri-level utility for BNP, PTH, ACTH, PCT and CT.

Multichem Immunoassay Quality Controls - Suitable for use on all major platforms			
PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem IA Plus	Assayed Tri-Level	3 x 4 x 5mL	IA310A
	Assayed Single Level (Level 1)	12 x 5mL	IA311A
	Assayed Single Level (Level 2)	12 x 5mL	IA312A
	Assayed Single Level (Level 3)	12 x 5mL	IA313A
	Unassayed Tri-Level	3 x 4 x 5mL	IA310X
	Unassayed Single Level (Level 1)	12 x 5mL	IA311X
	Unassayed Single Level (Level 2)	12 x 5mL	IA312X
	Unassayed Single Level (Level 3)	12 x 5mL	IA313X
	Mini Kit (contains one vial of each level)	3 x 1 x 5mL	IA310MX
Multichem IA	Assayed Tri-Level	3 x 4 x 5mL	IA300A
	Assayed Single Level (Level 1)	12 x 5mL	IA301A
	Assayed Single Level (Level 2)	12 x 5mL	IA302A
	Assayed Single Level (Level 3)	12 x 5mL	IA303A
	Unassayed Tri-Level	3 x 4 x 5mL	IA300X
	Unassayed Single Level (Level 1)	12 x 5mL	IA301X
	Unassayed Single Level (Level 2)	12 x 5mL	IA302X
	Unassayed Single Level (Level 3)	12 x 5mL	IA303X
Multichem IA Speciality	Assayed Tri-Level	3 x 4 x 2mL	BP300A
	Assayed Single Level (Level 1)	12 x 2mL	BP301A
	Assayed Single Level (Level 2)	12 x 2mL	BP302A
	Assayed Single Level (Level 3)	12 x 2mL	BP303A
	Unassayed (Tri-Level)	3 x 4 x 2mL	BP300X
	Unassayed Single Level (Level 1)	12 x 2mL	BP301X
	Unassayed Single Level (Level 2)	12 x 2mL	BP302X
	Unassayed Single Level (Level 3)	12 x 2mL	BP303X
	Mini kit (contains one vial of each level)	3 x 1 x 2mL	BP300MX

Multichem® IA Plus

Replace up to four competitor immunoassay QC products with Multichem IA Plus

Corresponding Competitor Products

Multichem IA Plus

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem[®] Cardiac Quality Control

Our core cardiac assessment product is the Multichem hsTn QC for high sensitive troponin assays. This product provides a high level of stability and confidence in your testing at the low concentrations that are relevant for today's cardiac assessment strategies. This product can be used as a stand-alone product or in conjunction with our consolidated immunoassay products; Multichem IA Plus or Multichem IA, that include a wide range of cardiac markers.

Multichem[®] hsTn

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

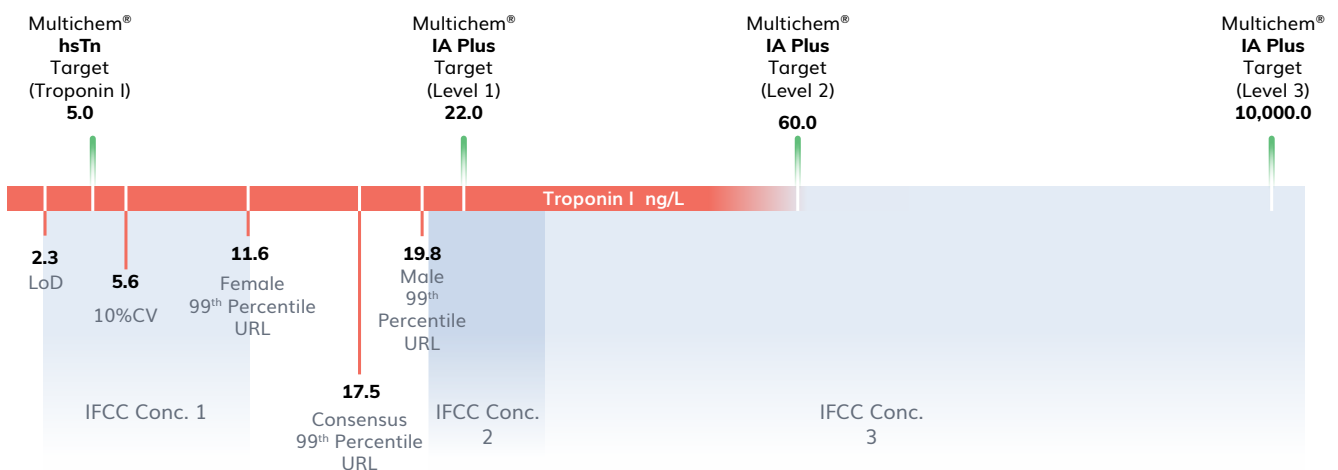

Multichem hsTn is suitable for use on all major platforms.

Order Information		
Multichem hsTn	Config.	Part Code
Assayed Single Level	12 x 3mL	HS301A
Unassayed Single Level	12 x 3mL	HS301X
Mini kit Unassayed Single Level	3 x 3mL	HS301MX

Analyte List

Troponin I
Troponin T

Example of Multichem hsTn Targeted Concentration on a Sample Platform

*Please refer to lot specific package inserts for stability and performance claims.

Multichem[®] Diabetes Quality Control

Our leading diabetes product is Multichem A1c, third party QC for haemoglobin A1c. The haemoglobin A1c test, also called HbA1c, glycated haemoglobin test, or glyco-haemoglobin, is an important blood test that shows how well a patient's diabetes is being controlled. The full list of products available are shown below.

Multichem[®] A1c

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 24 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C*.

Instruments

Multichem A1c is suitable for use on all major platforms.

Order Information		
Multichem A1c	Config.	Part Code
Assayed Bi-Level	2 x 6 x 1mL	HB000A
Assayed Single Level (Level 1) Assayed Single Level (Level 2)	12 x 1mL 12 x 1mL	HB001A HB002A
Assayed Mini Kit (Contains one vial of each level)	2 x 1 x 1mL	HB000M

Analyte List

HbA1c

Multichem[®] Fertility Quality Control

Multichem AMH Control is intended for use as a third party, tri-level, liquid stable quality control material to monitor the precision of laboratory testing procedures for Anti-Müllerian Hormone Assays.

Multichem[®] AMH

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C*.

Instruments

Multichem AMH is suitable for use on all major platforms.

Order Information		
Multichem AMH	Config.	Part Code
Assayed Tri-Level	3 x 4 x 2mL	AM500A
Unassayed Tri-Level	3 x 4 x 2mL	AM500X
Unassayed Mini Kit (Contains one vial of each level)	3 x 1 x 2mL	AM500MX

Analyte List

Anti-Müllerian Hormone

*Please refer to lot specific package inserts for stability and performance claims.

Multichem[®] Immunosuppressant Quality Control

Multichem WBT (WBT for Whole Blood Transplant), provides tri-level QC to monitor the precision of laboratory testing procedures for Cyclosporine, Tacrolimus and Sirolimus assays. The full list of products available are shown below.

Multichem[®] WBT

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 30 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem WBT is suitable for use on all major platforms.

Order Information		
Multichem WBT	Config.	Part Code
Assayed Tri-Level	3 x 4 x 2mL	WB000A
Unassayed Tri-Level	3 x 4 x 2mL	WB000X

Analyte List

Cyclosporine
Folate*
Glucose*
Sirolimus
Tacrolimus

Multichem[®] Coagulation Quality Control

Multichem D-Dimer Control is intended for use as a third party, bi-level, liquid stable quality control material to monitor the precision of laboratory testing procedures for D-Dimer Assays

Multichem[®] D-Dimer

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 30 day open vial stability at 2°C to 8°C*.

Instruments

Multichem D-Dimer is suitable for use on all major platforms.

Order Information		
Multichem D-Dimer	Config.	Part Code
Assayed Single Level (Level 1)	12 x 1mL	DM901A
Assayed Single Level (Level 2)	12 x 1mL	DM902A
Unassayed Single Level (Level 1)	12 x 1mL	DM901X
Unassayed Single Level (Level 2)	12 x 1mL	DM902X
Assayed Bi-Level	2 x 6 x 1mL	DM900A
Unassayed Bi-Level	2 x 6 x 1mL	DM900X
Unassayed Mini Kit (Contains one vial of each level)	2 x 1 x 1mL	DM900MX

Analyte List

D-Dimer

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Infectious Disease Quality Controls

- 21 day open vial stability at 2°C to 8°C.

Instructions for Use:

<https://eifu.technopathcd.com>

Order Information		
Multichem ID-COVID19 G	Config.	Part Code
Unassayed Positive Control	4 x 4mL	CVG200P
		CVG300P

Positive For

Immunoglobulin G (IgG) antibodies to SARS-CoV-2

NOTE

- This product is not intended for use in donor screening testing.
- This is an unassayed product, with no platform claims in the USA

**Available soon.

Multichem[®] ID-COVID19Neg

Features

- Ready to use liquid stable controls
- Technical and Scientific support

Specifications

- 36 month closed vial stability at 2°C to 8°C.
- 30 day open vial stability at 2°C to 8°C.

Instructions for Use:

<https://eifu.technopathcd.com>

Order Information		
Multichem ID-COVID19 G	Config.	Part Code
Unassayed Negative Control	4 x 4mL	CVN200N

Negative For

Immunoglobulin G (IgG) antibodies to SARS-CoV-2

NOTE

- This product is not intended for use in donor screening testing.
- This is an unassayed product, with no platform claims in the USA

Multichem® ID-B

Features

- Ready to use liquid stable controls
- Manufactured using native human plasma
- Direct sampling from control tubes
- Barcoded for ease of use
- Technical and Scientific support

Specifications

- 24 month closed tube stability at 2°C to 8°C.
- 90 day open tube stability at 2°C to 8°C.

Instructions for Use:

<https://eifu.technopathcd.com>

Order Information		
Multichem ID-B	Config.	Part Code
Unassayed Multi-Analyte Positive Control	4 x 5mL	SR103B
Unassayed Positive Control Mini Kit	1 x 5mL	SR103MB*

Positive For

Anti-HIV-1 IgG
 Anti-HCV IgG
 Anti-HBc IgG
 HBsAg
 Anti-HTLV-I IgG
 Anti-Treponema Pallidum IgG

INFORMATION FOR USA ONLY:

- This product is not intended for use in donor screening testing.
- This is an unassayed product, with no platform claims in the USA.

Multichem® ID-SeroNeg

Features

- Ready to use liquid stable controls
- Manufactured using native human plasma
- Direct sampling from control tubes
- Barcoded for ease of use
- Technical and Scientific support

Specifications

- 36 month closed tube stability at 2°C to 8°C.
- 90 day open tube stability at 2°C to 8°C.

Instructions For Use:

<https://eifu.technopathcd.com>

Order Information		
Multichem ID-SeroNeg	Config.	Part Code
Unassayed Negative Control	4 x 5mL	SR100N
Unassayed Negative Control Mini Kit	1 x 5mL	SR100MN

Negative For

Anti-HIV-1 IgG
 Anti-HCV IgG
 Anti-HBc IgG
 HBsAg
 Anti-HTLV-I IgG
 Anti-Treponema Pallidum IgG
 HIV 1 p24 Antigen*

INFORMATION FOR USA ONLY:

- This product is not intended for use in donor screening testing.
- This is an unassayed product, with no platform claims in the USA.

*Available soon.

Multichem® Independent Quality Controls for use on Abbott Alinity and ARCHITECT ci Systems.

Targeted at Clinical decision points, Technopath's consolidated Multichem QC is value assigned for Alinity and ARCHITECT ci systems. Consolidated controls increase laboratory efficiencies by reducing:

- Handling time
- Dead-volume waste
- Weight of waste consumables
- Storage requirements
- QC analysis time with IAMQC® Software.

Technopath is the ONLY validated and approved, on-board independent QC for the Abbott Alinity ci-series

Multichem® Chemistry Quality Controls

for Abbott ARCHITECT & Alinity c Systems

Multichem Chemistry Quality Controls - Suitable for use on Abbott c systems			
PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem S Plus for Alinity c Barcoded QC	Assayed Single Level (Level 1)	12 x 5mL	08P88-10
	Assayed Single Level (Level 2)	12 x 5mL	08P88-11
	Assayed Single Level (Level 3)	12 x 5mL	08P88-12
	Unassayed Single Level (Level 1)	12 x 5mL	08P87-10
	Unassayed Single Level (Level 2)	12 x 5mL	08P87-11
	Unassayed Single Level (Level 3)	12 x 5mL	08P87-12
Multichem S Plus for ARCHITECT c	Assayed Single Level (Level 1)	12 x 5mL	05P78-10
	Assayed Single Level (Level 2)	12 x 5mL	05P78-11
	Assayed Single Level (Level 3)	12 x 5mL	05P78-12
	Unassayed Single Level (Level 1)	12 x 5mL	05P79-10
	Unassayed Single Level (Level 2)	12 x 5mL	05P79-11
	Unassayed Single Level (Level 3)	12 x 5mL	05P79-12

Multichem® S Plus

Onboard and Offboard

Test consolidation for serum chemistry and immunology QC in a liquid stable format for Alinity and ARCHITECT systems

Benefits

- On-board storage on the Alinity c system in a temperature controlled reagent carousel.
- Automatically runs directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 30 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.
- 5 day onboard storage*

Instruments

Barcoded Multichem S Plus, independent clinical chemistry QC is value assigned for Abbott Alinity c and Architect c series instruments.

Order Information		
Multichem S Plus (Alinity)	Config.	Part Code
Assayed Single Level (Level 1)	12 x 5mL	08P88-10
Assayed Single Level (Level 2)	12 x 5mL	08P88-11
Assayed Single Level (Level 3)	12 x 5mL	08P88-12
Unassayed Single Level (Level 1)	12 x 5mL	08P87-10
Unassayed Single Level (Level 2)	12 x 5mL	08P87-11
Unassayed Single Level (Level 3)	12 x 5mL	08P87-12

Analyte List

Acetaminophen	Chloride	Lipase*
Acid Phosphatase*	Cholesterol HDL	Lipoprotein (a)*
ADNase B (Anti-Streptococcal DNase B)*	Cholesterol LDL	Lithium
Alanine Aminotransferase (ALT)	Cholesterol Total	Magnesium
Albumin BCG	Cholinesterase	Osmolality*
Alkaline Phosphatase (ALKP)	Complement C3	Phenobarbital
Alpha Hydroxybutyrate	Complement C4	Phenytoin
Dehydrogenase*	Copper*	Phosphorous
Alpha-1 Acidglycoprotein	Cortisol*	Potassium
Alpha-1 Antitrypsin	C-Reactive Protein	Prealbumin
Alpha-2-Macroglobulin*	Creatine Kinase (CK)	Properdin Factor B*
Amikacin	Creatinine Enzymatic	Prostatic Acid Phosphatase*
Amylase	Cystatin C*	Protein Electrophoresis*
Amylase Pancreatic	Digoxin	Protein, Total
Angiotensin Converting Enzyme*	Ethanol	Retinol Binding Protein*
Anti-streptolysin O (ASO)*	Ferritin*	Rheumatoid Factor
Antithrombin III*	Fructosamine*	Salicylate
Apolipoprotein A1	Gamma Glutamyltransferase	Sodium
Apolipoprotein B	Gentamicin	sTfR (Soluble Transferrin Receptor)*
Aspartate Aminotransferase (AST)	Glucose	Theophylline
Beta -2 Microglobulin	Haptoglobin	Thyroxine, Total (TT4)*
Beta Hydroxybutyrate Dehydrogenase*	Hemopexin*	Tobramycin
Bile Acids	IgE*	Total Iron Binding Capacity*
Bilirubin Indirect*	IgG1, Subclass*	Transferrin
Bilirubin, Direct	IgG2, Subclass*	Triglycerides
Bilirubin, Total	IgG3, Subclass*	Triiodothyronine, Total (TT3)*
C1 Inhibitor*	IgG4, Subclass*	Unsaturated Iron Binding Capacity (UIBC)
Caffeine*	Immunoglobulin A	Urea Nitrogen
Calcium	Immunoglobulin G	Uric Acid
Calcium Ionized*	Immunoglobulin M	Valproic Acid
Carbamazepine	Iron	Vancomycin
Carbon Dioxide (Bicarbonate)	Kappa Light Chain*	Zinc*
Ceruloplasmin	Lactate	
CH50 (Total hemolytic Complement)*	Lactate Dehydrogenase (LDH)	
	Lambda Light Chain*	

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® S Plus

Offboard

Test consolidation for serum chemistry and immunology QC in a liquid stable format for ARCHITECT systems

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 30 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Multichem S Plus, independent clinical chemistry QC will work on all Abbott platforms, but is value assigned for ARCHITECT systems only.

Order Information		
Multichem S Plus (ARCHITECT)	Config.	Part Code
Assayed Single Level (Level 1)	12 x 5mL	05P78-10
Assayed Single Level (Level 2)	12 x 5mL	05P78-11

Multichem[®] Immunology Quality Controls

for Abbott ARCHITECT & Alinity c Systems

Multichem Immunology Quality Controls - Suitable for use on Abbott c systems

PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem P for Alinity c Barcoded QC	Assayed Single Level Kit	12 x 3mL	08P90-10
Multichem P for ARCHITECT c	Assayed Single Level Kit	12 x 3mL	05P81-10

Multichem[®] P

Onboard and Offboard

Test Consolidation for Serum elevated Immunoprotein QC in a Liquid Stable Format for Alinity and ARCHITECT systems

Benefits

- On-board storage on the Alinity c system in a temperature controlled reagent carousel.
- Automatically runs directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Key elevated protein concentration for key medical relevance.
- Liquid for ease of use

Specifications

- 30 month closed vial stability at -20°C to -80°C*.
- 14 day open vial stability at 2°C to 8°C*.
- 7 day onboard storage*

Instruments

Barcoded Multichem P is assayed for Abbott Alinity and Architect c systems, and is value assigned for Alinity systems only.

Order Information

Multichem P (Alinity)	Config.	Part Code
Assayed Single Level	12 x 3mL	08P90-10

Analyte List

ADNase B (Anti-Streptococcal DNase)*	CH50 (Total hemolytic Complement)*	Immunoglobulin A
Albumin*	Complement C3	Immunoglobulin G

Multichem® Urine Chemistry Quality Control

for Abbott ARCHITECT & Alinity c Systems

Multichem Chemistry Quality Controls - Suitable for use on Abbott c systems			
PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem U for Architect c	Assayed Bi-Level Kit	2 x 6 x 5mL	05P80-10
Multichem U for Alinity c Barcoded QC	Assayed Bi-Level Kit	2 x 6 x 5mL	08P89-10

Multichem® U

Onboard and Offboard

Test consolidation for urine chemistry QC in a liquid stable format for Alinity and ARCHITECT systems

Benefits

- On-board storage on the Alinity c system in temperature controlled reagent carousel
- Automatically run directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 24 month closed vial stability at 2°C to 8°C*.
- 30 day open vial stability at 2°C to 8°C*.
- 7 day onboard storage stability*

Instruments

Barcoded Multichem U is assayed for Abbott Alinity c and Architect c series instruments, and is value assigned for Alinity systems only.

Order Information		
Multichem U (Alinity)	Config.	Part Code
Assayed Bi-Level	2 x 6 x 5mL	08P89-10

Multichem[®] Immunoassay Quality Controls

for Abbott ARCHITECT & Alinity i Systems

Multichem Immunoassay Quality Controls - Suitable for use on Abbott i systems			
PRODUCT	DESCRIPTION	KIT CONFIGURATION	PART CODE
Multichem IA Plus for Architect and Alinity i Barcoded QC	Assayed Tri-Level	3 x 4 x 5mL	08P86-10
Multichem IA Plus for ARCHITECT i	Assayed Tri-Level	3 x 4 x 5mL	05P76-10

Multichem® IA Plus

Onboard and Offboard

Test consolidation for serum immunoassay QC in a liquid stable format for Alinity and ARCHITECT systems

Benefits

- On-board storage on the Alinity i system in a temperature controlled reagent carousel.
- Automatically runs directly from the vial at user-defined intervals.
- Barcoded vials make loading faster and easier - minimizing errors.
- On-board stability is monitored by the Alinity system software.

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 28 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.
- 5 day onboard storage*

Instruments

Barcoded Multichem IA Plus is assayed for Abbott Alinity i and Architect i instruments, and is value assigned for Alinity systems only.

Order Information		
Multichem IA Plus (Alinity)	Config.	Part Code

Multichem® IA Plus

Offboard

Test consolidation for serum immunoassay QC in a liquid stable format for ARCHITECT systems

Specifications

- 28 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Barcoded Multichem IA Plus is assayed for Abbott Architect i series instruments.

Order Information

Multichem IA Plus (ARCHITECT)	Config.	Part Code
Assayed Tri-Level	3 x 4 x 5mL	05P76-10

Features

- Human matrix based proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Analyte List

17-Hydroxyprogesterone*	Estriol, Free*	Procainamide*
25 (OH) Vitamin D	Estriol, Total*	Procollagen type 1 amino-terminal propeptide (P1NP)*
Acetaminophen*	Estrogen, Total*	Progesterone
Adrenocorticotrophic hormone (ACTH)*	Ethosuximide*	Prolactin
Aldosterone*	Ferritin	Prostate Specific Antigen, Free
Alpha Fetoprotein	Folate	Prostate Specific Antigen, Total
Amikacin*	Follicle Stimulating Hormone	Quinidine*
Androstenedione*	Gentamicin	Renin*
Angiotensin*	High Sensitive Troponin I	Salicylate*
Anti-Thyroglobulin	Homocysteine	Sex Hormone Binding Globulin (SHBG)
Anti-Thyroperoxidase	Human Chorionic Gonadotropin (hCG)	T Uptake
BNP (1-32)	Human Growth Hormone*	Testosterone
CA 125	Ibuprofen*	Testosterone, Free*
CA 15-3	IgE	Theophylline
CA 19-9	Insulin	Thyroglobulin*
Caffeine*	Insulin-like Growth Factor (IGF-1)*	Thyroid Stimulating Hormone (TSH)
Calcitonin*	Leutinizing Hormone	Thyroxine Binding Globulin*
Carbamazepine	Lidocaine*	Thyroxine, Free (FT4)
Carbamazepine, Free*	Lithium*	Thyroxine, Total (TT4)
Carcinogenic Embryonic Antigen	Myoglobin	Tobramycin*
Chloramphenicol*	N-Acetyl procainamide*	Triiodothyronine, Free (FT3)
CK-MB	NT-proBNP*	Triiodothyronine, Total (TT3)
Cortisol	Ostase*	Troponin I
C-Peptide	Parathyroid Hormone (PTH) (1-84)	Troponin T*
Cyclosporine*	Parathyroid Hormone (PTH) (1-84) (STAT)	Ultrasensitive CRP*
DHEA Sulfate	Phenobarbital	Valproic Acid
Digoxin	Phenytoin	Valproic Acid, Free*
Disopyramide*	Phenytoin, Free*	Vancomycin
Erythropoietin (EPO)*	Primidone*	Vitamin B12
Estradiol

Multichem® Cardiac Quality Control

for Abbott ARCHITECT & Alinity i Systems

Multichem® hsTn

Offboard

Specifications

- 36 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.

Instruments

Barcoded Multichem hsTn is assayed for Abbott Alinity i and ARCHITECT i series instruments, and is value assigned for ARCHITECT systems only.

Order Information		
Multichem hsTn (Alinity / ARCHITECT)	Config.	Part Code
Assayed Single Level	12 x 3mL	04W26-10

Features

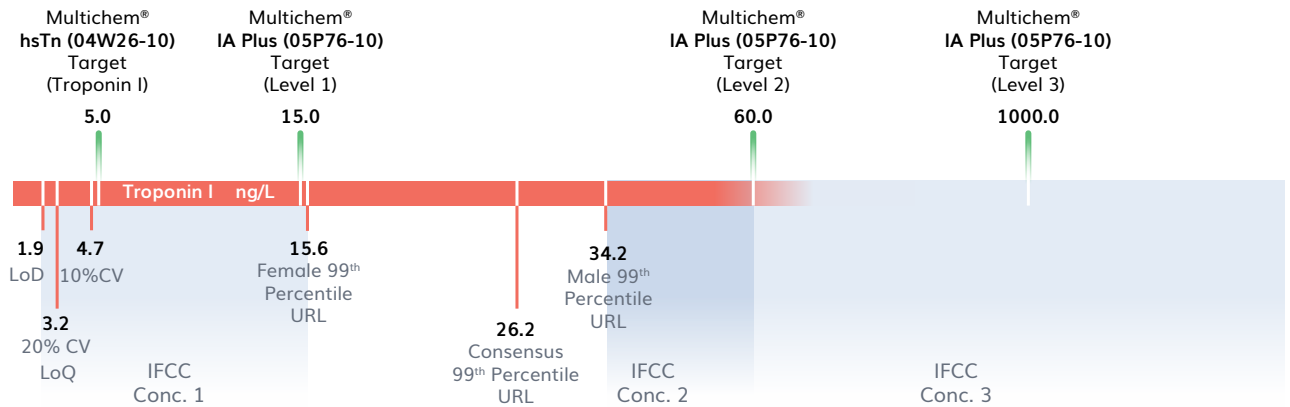

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Analyte List

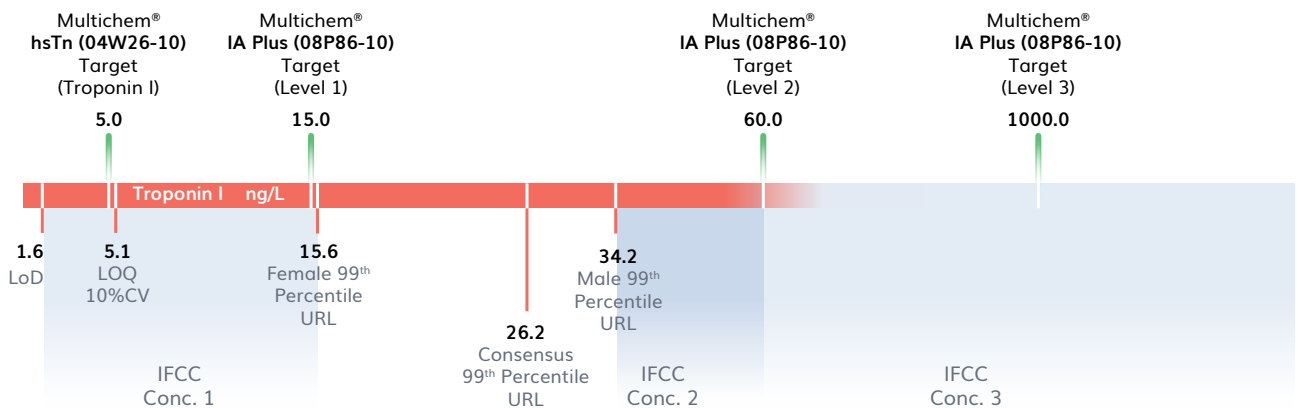

Troponin I

Abbott Architect STAT High Sensitive Troponin-I

Abbott Alinity STAT High Sensitive Troponin-I

*Please refer to lot specific package inserts for stability and performance claims.

Multichem® Diabetes Quality Control

for Abbott ARCHITECT & Alinity c Systems

Multichem® A1c

Offboard

Specifications

- 24 month closed vial stability at -20°C to -80°C*.
- 30 day open vial stability at 2°C to 8°C*.

Instruments

Multichem A1c is assayed for Abbott Architect c4000, c8000 and Alinity c systems.

Order Information		
Multichem A1c (ARCHITECT)	Config.	Part Code
Assayed Bi-Level	2 x 6 x 1mL	04V06-10

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Analyte List

HbA1c

Multichem® Immunosuppressant Quality Control

for Abbott ARCHITECT & Alinity i Systems

Multichem® WBT

Offboard

Instruments

Multichem WBT is assayed for Abbott ARCHITECT and Alinity systems.

Order Information		
- Please order through your local Abbott distributor -		
Multichem WBT (Alinity / ARCHITECT)	Config.	Part Code
Assayed Tri-Level for Architect	3 x 4 x 2mL	05P77-10
Assayed Tri-Level for Alinity	3 x 4 x 2mL	04S16-10

Features

- Human based matrix proprietary formulation.
- Mimics performance of patient samples.
- Targeted at key clinical decision points.
- Liquid for ease of use.

Specifications

- 30 month closed vial stability at -20°C to -80°C*.
- 10 day open vial stability at 2°C to 8°C*.

Analyte List

Cyclosporine
Folate*
Glucose*
Sirolimus
Tacrolimus

*Please refer to lot specific package inserts for stability and performance claims.

Eliminate the need to add separate open-date, expiry and initials labels to QC tubes!

Multichem® Independent Quality Controls for use on Roche cobas® systems

Targeted at Clinical decision points, Technopath's consolidated Multichem QC is value assigned for Roche cobas® analyzer systems. Consolidated controls increase laboratory efficiencies by reducing:

- Handling time
- Dead-volume waste
- Weight of waste consumables
- Storage requirements
- QC analysis time with IAMQC® Software.

Multichem® Clinical Chemistry Quality Control

for Roche cobas® systems

Multichem® S Plus

Load-and-Go

Test consolidation for serum chemistry and immunology QC in a liquid stable format for Roche cobas® systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid frozen for ease of use
- Assayed Chemistry QC
- Facilitates tri-level utility for Cholesterol HDL & LDL, APO A1, and Apo B
- Assayed and value assigned for Roche cobas
- Tri-level utility for immunoproteins

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C.

Instruments

Multichem S Plus, independent clinical chemistry QC is assayed and value assigned for Roche cobas® systems.

Order Information - Please order through Roche -

Multichem S Plus (cobas®)	Config.	Part Code
Assayed Single Level (Level 1)	12 x 4mL (48mL)	09339795190
Assayed Single Level (Level 2)	12 x 4mL (48mL)	09339809190
Assayed Single Level (Level 3)	12 x 4mL (48mL)	09339817190

Analyte List

ACE*	Cholesterol, HDL	Lactate Dehydrogenase (LDH)
Acetaminophen	Cholesterol, LDL	Lambda Light Chain
Acid Phosphatase (Non Prostatic)	Cholesterol, Total	Lipase
Acid Phosphatase (Non Prostatic)*	Cholinesterase	Lipoprotein (a)
Acid Phosphatase (Total)	CKMB*	Lithium
ADNase B (Anti-Streptococcal DNase B)*	Complement C3	Magnesium
Alanine Aminotransferase (ALT)	Complement C4	Osmolality*
Albumin	Copper*	Phenobarbital
Alkaline Phosphatase (ALKP)	Cortisol*	Phenytoin
Alpha 2 Macroglobulin*	C-Reactive Protein (CRP)	Phosphate
Alpha-1 Acid Glycoprotein	C-Reactive Protein (Ultra Sensitive)	Phospholipids*
Alpha-1 Antitrypsin	Creatine Kinase (CK)	Potassium
Alpha-Hydroxybutyrate dehydrogenase	Creatinine	Prealbumin
Amikacin	Cystatin C*	Properdin Factor B*
Amylase, Pancreatic	Dehydrogenase*	Protein Electrophoresis*
Amylase, Total	Digoxin	Retinol Binding Protein*
Anti-streptolysin O (ASO)	Ethanol	Rheumatoid Factors (RF)
Anti-thrombin III*	Ferritin**	Salicylate
Apolipoprotein A1 (APO A1)	Fructosamine	Sodium
Apolipoprotein B (APO B)	Gamma Glutamyltransferase (GGT)	Soluble Transferrin Receptor
Aspartate Aminotransferase (AST)	Gentamicin	Theophylline
Beta Hydroxybutyrate*	Glucose	Thyroxine (T4)*
Beta-2 Microglobulin	Haptoglobin	Tobramycin
Bicarbonate (CO2)	Hemopexin*	Total Iron Binding Capacity *
Bile acids*	Homocysteine**	Total Protein
Bilirubin Direct	IgE*	Transferrin
Bilirubin Indirect*	IgG1, Subclass*	Triglycerides
Bilirubin Total	IgG2, Subclass*	Triiodothyronine*
C1 Inhibitor*	IgG3, Subclass*	Ultra sensitive CRP
Caffeine*	IgG4, Subclass*	Unsaturated Iron-Binding Capacity (UIBC)
Calcium	Immunoglobulin A (IgA)	Urea
Calcium Ionized*	Immunoglobulin G (IgG)	Uric Acid
Carbamazepine	Immunoglobulin M (IgM)	Valproic acid
Ceruloplasmin	Iron	Vancomycin
CH50 (Total hemolytic Complement)*	Kappa Light Chain	Zinc*
Chloride	Lactate	

*Please refer to lot specific package inserts for stability and performance claims.

**These analytes are transitioning to claimed status, please refer to lot specific IFU.

Multichem[®] Immunology Quality Control

for Roche cobas[®] systems

Multichem[®] P

Load-and-Go

Test Consolidation for Serum elevated Immunoprotein QC in a Liquid Stable Format for Roche cobas[®] systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid frozen for ease of use
- Assayed and value assigned for Roche cobas
- Provides truly elevated values of specific proteins to control the analytical range
- Supplementary single-level immunoprotein control to complement Multichem S Plus
- Provides tri-level utility for RF when used in conjunction with Multichem S Plus

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 14 day open vial stability at 2°C to 8°C.

Instruments

Multichem S Plus, independent clinical chemistry QC is assayed and value assigned for Roche cobas[®] systems.

Order Information - Please order through Roche -		
Multichem P (cobas [®])	Config.	Part Code
Assayed Level P	12 x 4mL (48mL)	09339884190

Analyte List

- | | | |
|--|--------------------------------------|------------------------------|
| Albumin | Complement C3 | Immunoglobulin G (IgG) |
| ADNase B (Anti-Streptococcal DNase B)* | Complement C4 | Immunoglobulin M (IgM) |
| Alpha-1 Acid Glycoprotein | C-Reactive Protein (CRP) | Kappa Light Chain* |
| Alpha-1 Antitrypsin | C-Reactive Protein (Ultra Sensitive) | Lambda Light Chain* |
| Alpha-2 Macroglobulin* | Cystatin C* | Lipoprotein (a)* |
| Angiotensin Converting Enzyme* | Ferritin* | Prealbumin |

Multichem[®] Urine Chemistry Quality Control

for Roche **cobas**[®] systems

Multichem[®] U

Load-and-Go

Test consolidation for urinary chemistry QC in a liquid stable format for Roche **cobas**[®] systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid stable
- Assayed urine chemistry QC
- Bi-level utility
- Greater stability and performance for creatinine
- Assayed and value assigned for Roche **cobas**
- Addition of human based microalbumin provides greater accuracy and performance

Specifications

- 24 month closed tube stability at 2°C to 8°C.
- 30 day open tube stability at 2°C to 8°C.

Instruments

Multichem U, independent urinary chemistry QC is assayed and value assigned for Roche **cobas**[®] systems.

Order Information - Please order through Roche -		
Multichem U (cobas [®])	Config.	Part Code
Assayed Single Level (Level 1)	12 x 3mL (36mL)	09339868190
Assayed Single Level (Level 2)	12 x 3mL (36mL)	09339876190

Analyte List

Amylase
Calcium
Chloride
Cortisol*
Creatinine
Glucose

hCG*
Magnesium
Microalbumin
Osmolality*
Phosphate
Potassium

Sodium
Specific Gravity*
Total Protein Urine
Urea
Uric Acid

Multichem® Immunoassay Quality Control

for Roche cobas® systems

Multichem® IA Plus

Load-and-Go

Test consolidation for serum chemistry and immunology QC in a liquid stable format for Roche cobas® systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid frozen for ease of use
- Assayed Immunoassay QC
- Test consolidated immunoassay control includes general IA, cardiac markers and tumor markers
- Assayed and value assigned for Roche cobas
- Tri-level utility

Specifications

- 36 month closed vial stability at -20°C to -80°C.
- 10 day open vial stability at 2°C to 8°C.

Instruments

Multichem IA Plus, independent clinical chemistry QC is assayed and value assigned for Roche cobas® systems.

Order Information - Please order through Roche -		
Multichem IA Plus (cobas®)	Config.	Part Code
Assayed Single Level (Level 1)	12 x 4mL (48mL)	09339825190
Assayed Single Level (Level 2)	12 x 4mL (48mL)	09339841190
Assayed Single Level (Level 3)	12 x 4mL (48mL)	09339850190

Analyte List

17-OH Progesterone*
 Acetaminophen*
 Adrenocorticotrophic hormone (ACTH)
 Aldosterone*
 Alpha-Fetoprotein (AFP)
 Amikacin*
 Androstenedione**
 Angiotensin*
 Anti-CCP*
 Anti-Thyroglobulin (Anti-Tg)
 Anti-Thyropoxidase (Anti-TPO)
 BNP*
 CA 125
 CA 15-3
 CA 19-9
 Caffeine*
 Calcitonin
 Carbamazepine*
 Carbamazepine, Free*
 Carcinogenic Embryonic Antigen (CEA)
 Chloramphenicol*
 CK-MB
 Cortisol
 C-Peptide
 Cyclosporine*
 DHEA-S
 Digoxin
 Disopyramide*

Multichem® Infectious Disease Quality Control

for Roche **cobas**® systems

Multichem® ID-G

Load-and-Go

Positive multi-analyte infectious disease QC for Roche **cobas**® systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid for ease of use
- Technical and Scientific Support

Specifications

- 24 month closed tube stability at 2°C to 8°C.
- 90 day open tube stability at 2°C to 8°C.

Instruments

Multichem ID-G, independent serology QC is assayed and value assigned for Roche **cobas**® systems.

Order Information - Please order through Roche -		
Multichem ID-G (cobas®)	Config.	Part Code
Positive QC	4 x 4mL (16mL)	09339892190

Analyte List		
Anti-HBc IgG Anti-HCV IgG	Anti-HIV 1 IgG Anti-HTLV I IgG	Anti-Treponema pallidum IgG HBsAg

Multichem® ID-G Neg

Load-and-Go

Negative multi-analyte infectious disease QC for Roche **cobas**® systems

Features

- Human based proprietary formulation
- Mimics performance of patient samples
- Liquid for ease of use
- Technical and Scientific Support

Specifications

- 36 month closed tube stability at 2°C to 8°C.
- 90 day open tube stability at 2°C to 8°C.

Instruments

Multichem ID-G neg, independent serology QC is assayed and value assigned for Roche **cobas**® systems.

Order Information - Please order through Roche -		
Multichem ID-G Neg (cobas®)	Config.	Part Code
Negative QC	4 x 4mL (16mL)	09339906190

Analyte List		
Anti-HBc IgG Anti-HCV IgG Anti-HIV 1 IgG Anti-HIV 2 IgG	Anit-HIV Group O Anti-HTLV I IgG Anti-Trypanosoma cruzi IgG (Chagas) Anti-Treponema pallidum IgG	HBsAg HIV p24 Antigen

*Please refer to lot specific package inserts for stability and performance claims.

QC Data Management Solutions

Product	Description	Ordering
IAMQC Infinity	Next generation cloud based software, designed to meet your QC solution needs.	Contact our QC Software experts to find the 'best fit' QC software solution for your laboratory. technopath.qcsoftware@lgcgroup.com
IAMQC Peer	Real-time peer cloud-based comparison software	
IAMQC Transfer	Advanced connectivity solution for laboratories	

Analyse QC results in real-time

Designed to complement and support Technopath's Multichem® Quality Control (QC) product range, IAMQC Software provides Laboratory Managers and Technologists with a range of QC software tools to analyse their QC results in real-time.

IAMQC Software products allow users to automate, centralise, standardise and improve QC processes in a laboratory setting. The software satisfies the varying levels of QC requirements in individual laboratories and is easily applied to meet your quality goals.

Technopath's full suite of software products provide clinical laboratories with significant cost and time savings, whilst delivering higher confidence in analytical testing methods. IAMQC software products are practical, graphical, user-definable and easy to use.

IAMQC Software Products Help:

BENCH TECHNOLOGISTS:

- Spend less time on false positive QC flags.
- Concentrate on tests that require their attention.
- Spend less time trouble-shooting QC.
- Know how to react when the mean shifts.
- Assess the acceptability of new reagent lots and calibration events.
- Solve QC problems.
- QC target data automatically downloaded to the instrument*

LAB MANAGERS:

- Choose QC rules to maximise true rejects and minimise false rejects.
- Quickly see the tests that require their attention.
- Skim graphics to quickly review current or historical data by lab, department, instrument or test.
- Monitor performance in groups of laboratories.
- Review problem tests and QA activities in local and remote labs.

LAB OR HOSPITAL ADMINISTRATORS:

- Save money.
- Improve quality.
- Improve service.
- Review Administrative Summary Reports to ensure quality performance.

**Please contact with us for specific information for your diagnostic platform.*

IAMQC® Infinity

Next Generation Solutions

IAMQC Infinity is designed as a QC data management solution that complements and supports Technopath Clinical Diagnostics Multichem® Quality Control (QC) product range, and provides Laboratory Managers and Technologists with a range of QC software tools to analyse their QC results in real-time. IAMQC Infinity is practical, graphical, and easy to use and provides laboratories with a centralised standardised approach to QC data management.

Laboratories today have many constraints in their daily process including labour, time, and budget. IAMQC Infinity helps to address these issues through a web-based system designed to manage QC data.

Providing access to advanced QC data management tools through a software-as-a-service platform removes the budgetary constraints that currently exist with products available today. Setup wizards save time for laboratories by providing all options available via drop-down lists and removing the need for manual entry by skilled laboratory technologists.

IAMQC Infinity allows users to automate, centralise, standardise and improve QC processes in a laboratory setting. Our combination of features in one system satisfies the varying levels of QC requirements in individual laboratories and is easily applied to meet different QC management expectations. IAMQC Infinity provides clinical laboratories with significant cost and time savings, whilst delivering higher confidence in analytical testing methods.

What is an interlaboratory program?

In its simplest form, an interlaboratory program is a means for individual labs to compare their performance against other labs. The comparison will be against other labs using the same lot of quality control (QC) material on the same test and on the same instrument type. Interlaboratory programs offer various reports to show how your instruments in your lab compare against all others with these reports being generated at the end of the month once all data has been submitted. Some interlaboratory programs offer real-time peer comparison where the values displayed are based on all of the data that has been submitted up to the time of report generation or statistic viewing.

Why should you use an interlaboratory program?

Any laboratory that strives to achieve ISO accreditation should be part of an interlaboratory program:

The inputs to management review shall be recorded and shall include evaluations of results of participation in interlaboratory comparison programmes;

ISO 15189, Fourth Edition 2022-12, "Medical laboratories - Requirements for quality and competence", subclause 8.9.2 (h).

This ISO standard specifies the quality management system requirements particular to medical laboratories and helps to set a level of performance and competency that labs should attain. The medical laboratory is an important part of patient care as all tests results come from the lab so ensuring your systems are in control is a vital part of this process. An interlaboratory program can provide comfort to the lab by demonstrating that your performance is in line with other labs. When your lab's performance is not in line with others, the interlaboratory program highlights this to you quickly.

How does IAMQC Peer help with participation in an interlaboratory program?

IAMQC Peer is a web based truly real time peer comparison system. Truly real-time means that all data submitted is included in the peer statistics at the time of report generation or when viewing the interactive peer statistics. IAMQC Peer shows labs each of their individual instruments performance and compares the accuracy and precision of the analytical processes to their peer group. The peer group will contain instruments of the same type from other laboratories using the same lot of QC material and using the same method for the test. The information from the reports and interactive peer statistics in IAMQC Peer can be extremely valuable, indicating the user's performance relative to their peer group as well as providing powerful troubleshooting tools when attempting to resolve potential problems. IAMQC Peer has multiple interfacing solutions to allow for the automation of data submission helping busy lab personnel to concentrate on the important activities of testing and result interpretation.

IAMQC Peer contains multiple reports, all of which provide key information to the lab in interpreting their instrument performance.

Reagent Lot Report

Automates the tracking and reporting of reagent lot-to-lot variation.

Group Coordinator Report

A test-by-test listing of statistics of the laboratory and its peer groups for up to 3 levels of control.

Levey-Jennings Report

The LJ report displays individual QC values per analyte for the selected month. It also indicates when a reagent lot was changed.

Exceptions Report

This report details the lab's tests and analytical methods which differ in performance from its peer group using SDI and CVI.

Monthly Summary Report

A rolling twelve-month window of summary statistics,

including monthly mean for each test and level, is displayed along with peer group values.

Youden Plot

The Youden plot visualizes both bias and imprecision graphically and can be used to evaluate systematic and/or random error.

Six Sigma

The six sigma report automatically calculates the lab's sigma score based on the Total Allowable Error values entered.

Measurement of Uncertainty

The system calculates the MoU value automatically based on the time-range selected for the lot in question along with the Standard Error of the Mean (SEM) value or the running SD of each test for the time period selected.

Bias Report

The bias report contains all the information in the Group Coordinator report plus a bias score against the cumulative peer mean for each test and is generated in Microsoft Excel format.

The most advanced connectivity solution available for laboratory instrumentation.

IAMQC® Transfer

IAMQC Transfer is a connectivity device that can communicate with Laboratory Information Systems (LIS), Middleware, automated instrumentation and Point Of Care platforms.

Through the use of our proprietary drivers and a single board computer device, IAMQC Transfer processes and communicates data from your system to IAMQC, cloud-based software.

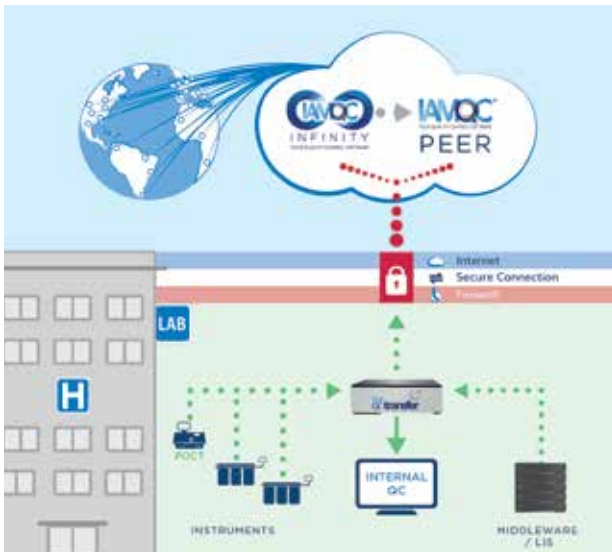

IAMQC Transfer features a plug-and-play set up, combined with multiple connectivity options, ensuring an un-matched level of flexibility – all within an incredibly small, seamless enclosure.

**CLINICAL
DIAGNOSTICS**

Technopath is part of LGC Clinical Diagnostics

LGC Clinical Diagnostics is a leading provider of Quality Measurement Tools, biological materials, and reagents for the IVD and extended life science industry.

By bringing together four industry-leading companies, our combined and ever-growing capabilities mean we are better positioned to support the needs of the clinical diagnostics industry.

Together, we are working to enable laboratories to deliver patient results with confidence.
